ABOUT ORDERS, SHIPPING, ETC.

The prices quoted in this list do not include cost of delivery, which must be paid by the purchaser. We make no charge for bags, boxes, or packing.

Parcel Post.

Parcel post rates are very low to places within 150 miles of Rochester. Only 1c per pound after the first pound which is 5c.

The following tables gives the rates to different parts of the country:

	1 lb.	Each additional lb.		1 lb.	Each additional lb.
Alabama08	.06	Montana11	.10
Arkansas08	.06	Nebraska09	.08

When ordering seeds sent by parcel post please add enough money to the price to cover the necessary postage which we shall have to pay.

BY EXPRESS. The express rates are now a little lower than parcels post on all lots weighing 15 pounds or more. On smaller packages parcels post is cheaper. Express charges need not be prepaid, but parcels post must be.

BY FREIGHT. Lots weighing over 100 pounds will go much cheaper by freight than by express, but it takes longer for freight to get through. If seeds are wanted immediately and you are willing to pay the extra cost it is best to have them sent by express.

Please state on your order how you wish the seeds sent.

CONDITIONS OF SALE. We agree to assume the responsibility of the seeds and plants we sell reaching the purchaser in good condition, and should any seeds fail to grow under favorable conditions, or prove not true to name or of inferior quality, we will **REFUND THE MONEY PAID FOR THEM** or replace them without charge, but all our seeds and plants are sold on the distinct understanding and with the agreement by the purchaser that we will not be liable for any loss or damage that may occur by reason of the failure of seeds or plants to grow or to be of the variety or quality offered. We will not accept or fill orders on any other terms.

JOSEPH HARRIS CO.

TERMS. Our regular terms are cash with order, less a discount of 2 per cent. except Grass seeds, Potatoes and Onion sets, which are net. We should, however, be glad to open accounts with any gardeners of established credit, or who will furnish us satisfactory references. On such accounts all bills are due September 1.

JOSEPH HARRIS CO.,

Coldwater, N. Y.

November 10, 1919.

[illegible]

A View of a Small Part of Our Trial Grounds

QUALITY SEEDS

Every market grower knows the advantages to be gained by using seeds of high quality that will produce crops that are **uniform** and of the **best type** so that the product sells for the highest prices. **Such seeds are not easy to get.**

Seeds of ordinary quality that will grow and produce fairly good crops can be easily obtained, but really **high quality** seeds are hard to find.

We have sometimes wanted to get a little seed of a superior strain of some variety and have paid extremely high prices to some well-known dealer for it, only to find that it was of just ordinary quality.

We came to the conclusion years ago that the only way to get good seeds was to raise them ourselves.

We have been working for many years to improve strains of the best varieties of vegetables and flowers by selection and "breeding" and each year we note improvements in uniformity and yield.

We are determined to make the name "Harris" stand for Quality in seeds.

A prominent gardener of Michigan writes March 9, 1919.

"All seeds ordered have arrived. Your prices are higher than some others, but 15 years experience with Harris' Seeds give me perfect confidence in their purity and vigor."

This Label tells how many seeds will grow

When you buy seeds you have a right to know how many of them are of good vitality. Some seeds contain as much as 75 per cent dead seeds, while others only 1 or 2 per cent. If there is nothing to indicate which seed is of low vitality and which is practically all good the purchaser cannot tell how thick to sow.

Harris' Seeds are all marked showing what percentage is of good vitality.

According to Our Tests

98 per cent

of this seed germinates

This little label is put on every lot of seed (except packets) and tells you what proportion of the seeds germinated in our test of this particular lot,

This enables the purchaser to judge quite accurately how thick to sow the seed to get a perfect stand of plants.

The seeds are all given accurate tests either in soil or a germinating apparatus so there is no guess work about it.

DIRECT FROM THE GROWER

We raise on our own farm nearly all our **special strains** of vegetable and flower seeds. They are grown from the most carefully selected plants and are bred up to a high standard. When you buy these special varieties from us you are getting seeds from first hands.

Crosby's Egyptian Beet

HARRIS' SPECIAL STRAIN OF CROSBY'S EGYPTIAN BEET

Particular gardeners who want the very finest beets both in shape and color will find this special stock to meet their requirements.

The seed is of our own growing on Moreton Farm and the most careful selection has been practiced for more than fifteen years until now we have a strain that is practically "fixed" so that the beets come all alike, nearly every one a model for shape and color.

The beets are globe shape, very deep red and perfectly smooth with very small tap root. The tops are unusually small. This beet grows very rapidly and is ready for market **earlier** than any other kind we know of. It is much earlier than Detroit Dark Red and a few days earlier than Early Wonder.

Harris' Special Strain of this beet is much superior in uniformity of shape and color to any other strain we have ever tried, and we have grown in our trial grounds practically every stock offered by other dealers. Get this seed if you want the best obtainable. **Oz.** 15c; $\frac{1}{4}$ lb. 45c; lb. \$1.60.

FULL MEASURE BEAN

While not a brand new variety the Full Measure is not as well known as it should be. We consider it one of the **very best** green podded snap beans either for market or home use.

The pods are long, straight, light green, as round as a pencil, and very thick, fleshy, and of the very highest quality.

The vines are **vigorous** and very **prolific**, so the yield produced is unusually large. We know of no other dwarf bean which matures as early that produces so large crops as the Full Measure.

The beans mature four or five days later than the earliest varieties such as Black Valentine and Giant Stringless, but the yield is much larger and the beans are of far superior quality.

Qt. 55c; Peck \$3.50; Bu. (60 lbs.) \$12.50.

EARLY LEVIATHAN LIMA BEANS

The Leviathan has proved to be the largest and most prolific pole Lima suitable for the northern parts of the country. The beans mature a week earlier than other large podded Limas and the vines produce heavy crops.

The pods are **very large** and often contain five or six large beans.

We have an unusually fine strain of Leviathan Limas which produces **very large pods** and **matures early**.

Qt. 60c; Peck (14 lbs.) \$3.75; Bu. (56 lbs.) \$13.50; 100 lbs. \$24.00.

ARTICHOKE

The Globe Artichoke produces the flower buds which are used for food the second year after growing the seed. The plants are not hardy and require protection in winter north of Virginia.

	Oz.	¼ Lb.	Lb.
Large Green Globe. The standard variety	\$.60	\$2.00	
JERUSALEM. Bulbs. Qt. 20c; pk. 85c; bu. \$2.75.			

ASPARAGUS SEED

	Oz.	¼ Lb.	Lb.
Palmetto. A very fine American variety	\$.08	\$.15	\$.55
Giant Argenteuil. A large French variety, fine08	.18	.60

ASPARAGUS ROOTS

We can furnish extra heavy roots. See page 15 of our general catalogue.

	100	1000
Giant Argenteuil, 1 year roots	\$.90	\$4.50
2 year roots	1.25	6.50
3 year roots	1.50	8.50
Palmetto. Same price as above.		

BEANS—Dwarf Wax Varieties

Of the wax or yellow-podded bush beans the most popular variety for market is Wardwell's Kidney Wax. This bean is quite apt to rust in wet weather and for this reason Currie's Rust-Proof is preferred by many. The pods are broad and deep yellow, but not quite as long as Wardwell's. Both mature very early. Burpee's New Kidney Wax resembles Wardwell's, but has narrower pods. Hodson Wax is late and very prolific; pods long, narrow and flat.

	Qt.	Pk.	Bu.
	(14 lbs.)	60 lbs.)	
WEBBER WAX or "CRACKER JACK." The earliest wax bean and has long, straight, flat pods that are quite free from rust. A heavy bearer	\$.65	\$3.75	\$14.00
Valentine Wax. Extra early, round pods, free from rust65	4.00	—
Wardwell's Kidney Wax. Very long, flat, deep yellow pods65	3.85	14.50
BURPEE'S NEW KIDNEY WAX. Has narrower and thicker pods than Wardwell's and is more prolific65	4.00	15.00
ROUND POD KIDNEY WAX. Like Wardwell's with round instead of flat pods65	4.00	15.00
Davis' White Wax. Hardy and prolific. Long, flat, yellow pods of fair quality65	3.75	14.00
Golden Wax. Improved Rust-proof60	3.50	13.75
Hodson Wax. Late, very prolific, long straight pods60	3.50	13.75
CURRIE'S RUST-PROOF BLACK WAX. Hardy and very prolific60	3.50	13.50
Refugee Wax. Round pods of fine quality, very prolific, matures late ..	.60	4.00	15.00

BEANS—Dwarf Green-Podded Varieties

If your market requires a round-pod bean, Full Measure, Giant Stringless Valentine and Black Valentine are the most profitable. If a flat pod is required, Bountiful is the best early variety.

	Qt.	Pk.	Bu.
	(15 lbs.)	(60 lbs.)	
Full Measure. Very prolific, long, round pods. Medium early and a profitable market variety	\$.55	\$3.50	\$12.50
STRINGLESS GREEN POD. Round, thick, light green pods of high quality50	3.25	12.00
GIANT STRINGLESS VALENTINE. Larger than the old Valentine, and fully as early. Very prolific and one of the very best green-podded bush beans. Round, light green pods of high quality50	3.25	12.00
BLACK VALENTINE. A profitable market bean. Produces immense crops of long, straight, light green pods, round as a pencil and very attractive in appearance55	3.00	11.25
Bountiful. Very prolific. Long, flat pods of fine quality; very early ..	.55	3.50	12.50
Improved Round Pod Valentine. Extra early50	3.25	12.00
Refugee. Late, very prolific50	3.25	12.00
Goddard or Boston Favorite. Used for shelling green55	3.50	12.50
Ruby Dwarf Horticultural. Used for shelling green55	3.50	12.50
FRENCH HORTICULTURAL. The best strain of dwarf Horticultural beans. More prolific and vigorous and free from disease than other kinds. Pods long, straight and highly colored, matures a little later than Ruby Dwarf Horticultural55	3.50	12.50

LIMA BEANS—Dwarf or Bush Varieties

Where beans are sold in the pods, Fordhook is the most popular bush Lima. The beans are of good size and very plump, and the vines are prolific. For shelling, Burpee's Bush Lima of the old type and Burpee's Improved (new) are the best kinds. The beans are large and flat.

	Qt. (14 lbs.)	Pk. (56 lbs.)	Bu.	100 lbs.
FORDHOOK BUSH LIMA (New). A greatly improved strain of Dreer's or Potato Lima. Large pods and very large thick beans of deep green color. The best of this class ..\$.70	\$4.25	\$16.25	\$29.00
Henderson's Bush Lima . Small, early and prolific55	3.50	11.20	20.00
BURPEE'S BUSH LIMA, New Wonder Strain . Large, medium early. The most popular Dwarf Lima65	4.00	15.15	27.00
Burpee's IMPROVED Bush Lima (New). Larger pods and thicker beans than the old variety and of deeper green color. A little later than New Wonder Strain70	4.25	16.25	29.00

Pole Lima and Other Pole Beans

Of the Pole Limas, Early Leviathan is the earliest kind with large pods. Challenger has thick, plump beans like Dreer's or "Potato" Lima, and is the best variety of this class.

Golden Cluster Wax has immense long, wide, deep yellow pods of high quality as a snap bean.

Scotia and Kentucky Wonder have long, round, green pods of high quality. Lazy Wife has long, flat, green pods.

	Qt. (14 lbs.)	Pk. (56 lbs.)	Bu.	100 lbs.
EARLY LEVIATHAN LIMA . Very early, large pods. The best pole Lima60	\$3.75	\$13.50	\$24.00
King of Garden Lima . Long pods and large flat beans60	3.75	13.50	24.00
CHALLENGER LIMA . An improved strain of Dreer's Pole Lima. Large plump beans of the "Potato" class65	4.00	15.15	27.00
Golden Cluster Wax . Produces long, broad, deep yellow pods of finest quality; beans white65	4.00	—	—
Kentucky Wonder . Long, slender, green pods of fine quality. Early and very prolific60	3.75	14.40	—
Kentucky, Wonder Wax . Long, round, yellow pods, very prolific60	3.75	14.50	—
SCOTIA . Long, slender, green pods of the very finest quality. Wonderfully prolific70	4.50	18.00	—
Lazy Wife . Large, flat, green pods; very productive70	4.50	—	—
Speckled Cranberry or London Horticultural70	4.50	—	—

FIELD BEANS

(Prices subject to change. Please write for price per bushel.)

	Qt. (15 lbs.)	Pk. (60 lbs.)	Bu.
Boston Marrow or White Marrowfat . Large, plump, white beans ...\$.50	\$2.75	\$ —
Marrow Pea or White Navy . Small white beans. The most popular variety50	2.50	—
ROBUST PEA BEANS . A select strain of Pea beans that is free from the mosaic disease65	3.00	11.00
Red Kidney . Large red beans, very prolific and a profitable variety ..	.50	2.75	—
White Kidney . Large white kidney-shaped beans60	3.00	—

WHAT OTHERS SAY ABOUT HARRIS' SEEDS

"The seeds I got from your house the past year were the best I ever had. The way my garden looked each seed must have come up twice."—**Michael Sook**.

"Last year I got a few seeds of B—— as well as from you. In most every case they were inferior to yours and were more expensive."—**L. E. Johnson**, Richfield Springs, N. Y.

"We are anxious to know if you will be in line to furnish seeds of all varieties as usual. We would rather have your seeds than many others as they have always proved as recommended."—**E. C. Baker & Sons**, Jackson, Mich.

"We sent you a large order last season and did not have a single failure."—**W. R. Curtis Co.**, Ransomville, N. Y.

"I own a large fruit and truck farm and have used Harris' Seeds three successive years and find them excelled by none. There was a time when I had to guess at seed results, but now with Harris' tested seeds the guessing part is a back number."—**Howard S. Taylor**, North Andover, Mass.

"The seeds bought of you this year have been the finest, all true to name and every one good."—**G. W. Stiener**, Horseheads, N. Y.

"I have been buying your seeds for 8 or 10 years and their high quality and freshness have always brought me the greatest satisfaction. I invariably recommend them to friends and neighbors who have farms or gardens and desire something better in the line of seeds than they can get at the country grocery store."—**Timothy G. Remick**, Pine Hill, N. Y.

BEETS

For early bunching Crosby's Egyptian is the most popular kind; and if a really first-class strain is used there is no better beet for the purpose. Some gardeners prefer the old flat Egyptian Blood Turnip beet, because it makes salable beets a little quicker than Crosby's. For later use Detroit Dark Red and Long Season are excellent. For late fall and winter use it is best to sow the seed about the middle of July in the North and a little later further South. It requires about 10 lb. of seed to sow an acre.

	Oz.	¼ Lb.	Lb.
Crosby's Egyptian, Harris' Selected Strain. The finest bred stock of this beet. See description page 2. Seed of our own growing	\$.15	\$.45	\$ 1.60
Crosby's Egyptian. Not of our own growing, but a very good strain, superior to most of the seed sold by other dealers10	.30	.95
Egyptian Blood Turnip. Flatter than Crosby's, and is preferred by some for early bunching10	.25	.75
DETROIT DARK RED. Round, smooth, deep red beets. One of the best kinds. Our seed is grown from very carefully selected beets of uniform globe shape and dark red color10	.25	.90
ECLIPSE. Early, globe-shaped and dark red color10	.25	.85
Edmund's Blood Turnip. Large flat beets. Excellent for fall use10	.25	.85
Early Blood Turnip. A good old variety, much like Edmund's10	.25	.85
Early Bassano. Large, flat, light-colored beets10	.25	.85
Long Smooth Blood Red. Grows 8 to 10 inches long and very dark red10	.25	.90
LONG SEASON. A very late variety of fine quality. Better adapted to home use than for market. Keeps in nice tender condition all winter25	.70	—

Mangels and Sugar Beets for Stock

	Oz.	¼ Lb.	Lb.
DANISH YELLOW GIANT. An immense yielder. Very large, deep yellow and rich	\$.08	\$.20	\$.60
Golden Tankard. Oval and easily harvested; yellow flesh. The strain we offer is very fine08	.20	.55
NEW "HALF SUGAR" MANGEL. Intermediate between a sugar beet and mangel. Yields immense crops of beets rich in sugar08	.18	.45
Mammoth Long Red. Very large, long red roots of good quality. One of the best yielders and keeps well08	.18	.50
Eckendorf Giant. Very large yellow mangel. Blunt at the bottom, easily harvested and immense yielder08	.20	.60

Beets for Greens—SWISS CHARD or SPINACH BEET

The Silver Leaf has smooth, light-green leaves with very broad, white ribs and is the most popular variety for market. Lucullus grows very large and has crinkled leaves with yellowish ribs. Both varieties are quite hardy and will survive the winter if given some protection.

	Oz.	¼ Lb.	Lb.
Silver Leaf. Large, light-colored leaves with white ribs	\$.10	\$.25	\$.90
LUCULLUS. Very large crinkled leaves with light-yellow ribs. Grows larger and is of better quality than the old kinds10	.25	.95

BRUSSELS SPROUTS

Cultivation is the same as for cabbage or cauliflower. There is always a good demand for the sprouts, and they bring profitable prices. The best variety we have found is Danish Improved.

	Oz.	¼ Lb.	Lb.
DANISH IMPROVED. A new strain which we have found to be very fine. Nearly every plant makes good solid sprouts35	1.00	3.75
Long Island Improved Dwarf. Not as good as Danish Improved25	.75	2.75

HARRIS' TESTED SEEDS—WITH THE TEST PUT ON!

Many dealers advertise "tested seeds" but what does that signify? The seeds may be tested and found of very low vitality, yet are sold as "tested seeds."

Harris' seeds are not only tested, but the **per cent. that grows is marked on each lot sold** so the purchaser can tell just how many seeds to sow to get the right number of plants in the rows.

Enkhuizen Glory Cabbage (Photograph)

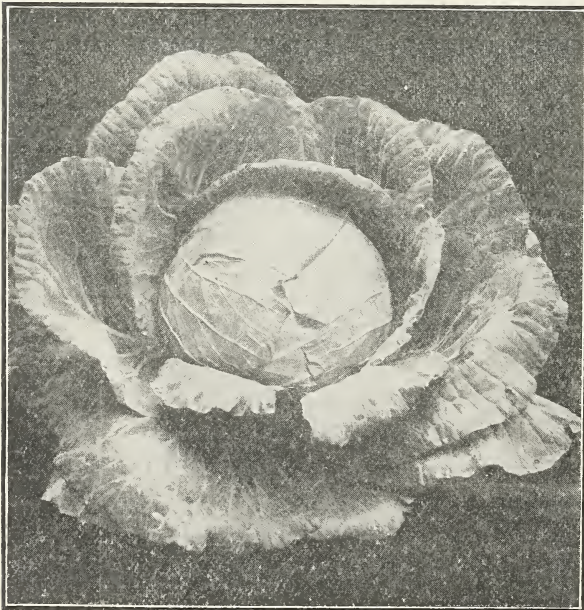

ENKHUIZEN GLORY CABBAGE

This cabbage is as early as Charleston Wakefield and grows twice the size. The heads are as round as a ball, very solid and heavy, often weighing 10 pounds or more. It has few outside leaves and will bear close planting.

FOR LATE CROP. This is not only a great cabbage for early market, but it is also a most profitable variety to raise for fall use. If the plants are set out in this locality (western New York) the middle of July the cabbage will mature ready for market in October and immense crops can be raised.

For Kraut there is no better cabbage than the Glory. It is fine grained and makes kraut of the best quality.

We have an exceptional fine strain of this cabbage that produces heads of uniform type, large size and very solid, and practically every plant will make a good head. Oz. 40c; $\frac{1}{4}$ lb. \$1.40; lb. \$5.50.

Copenhagen Market Cabbage

Jan. 10, 1918.

"Please reserve me 4 pounds Enkhuizen Glory cabbage seed, as your last year's seed raised the best cabbage around here. Every plant headed solid for first cutting. There was practically no cracked heads."—E. W. Bennett, Victor, N. Y.

COPENHAGEN MARKET CABBAGE

The earliest round head cabbage we know of. As early as Wakefield and larger heads. As round as a ball; very compact with few outside leaves. Heads very uniformly; practically every plant making a good firm head and every one alike as two peas.

The most remarkable point about this cabbage is its uniformity—every plant under normal conditions will produce a good, solid head, and every head as like another as two peas in a pod.

This is a profitable cabbage to grow for market and an excellent early variety for the home garden.

Oz. 55c; $\frac{1}{4}$ lb. \$1.75; lb. \$6.75.

CABBAGE—Early Varieties

Jersey Wakefield has long been the standard extra early cabbage, but a round head sells better in most markets and on this account Copenhagen Market has proved more profitable. It is almost as early and has larger heads which are perfectly round. Enkhuizen Glory has larger heads and is a week later. Burpee's All Head has large flat heads and is a week or two later than the Enkhuizen Glory.

	Oz.	¼ Lb.	Lb.
EARLY JERSEY WAKEFIELD. Extra fine selected strain; heads uniform in shape and mature at the same time	\$.40	\$ 1.25	\$ 4.50
CHARLESTON WAKEFIELD. Larger and 10 days later than Jersey Wakefield. We have a very fine strain40	1.30	4.75
COPENHAGEN MARKET. Heads round, medium size and very solid. Matures very early and every plant makes a good firm head55	1.75	6.75
ENKHUIZEN GLORY. A very large, early cabbage. Heads as large as late kinds and mature as early as Charleston Wakefield. Has proved to be a most profitable variety40	1.40	5.50
BURPEE'S ALL HEAD EARLY, Extra Selected Strain. Heads of good size, deep, solid and heavy. Matures medium early. Largely used for main crop for fall market and shipping, for which purpose it has proved very profitable. Our strain of this variety is very fine40	1.25	4.75
Henderson's Early Summer. A fine early flat cabbage35	.90	4.50
Early Spring. Very early, flat heads, short stem40	1.25	4.75
Stanley. Pointed heads of high quality. Not suitable for market....	.35	1.10	—

CABBAGE—Late or Main Crop Varieties

For fall use the early varieties are usually the best, but the plants should be set out not earlier than July 1 in New York State, and later farther south.

Enkhuizen Glory is one of the best kinds for market or kraut, having large round heads of fine quality.

For late fall and winter market the Danish Ballhead is the most profitable. The Short Stemmed strain we offer yields more than any other of the Danish type, but is not as deep green as the Solid Emperor or Tall Stemmed strain, which has smaller heads and does not yield quite as many tons per acre.

Savoy cabbage is often a profitable crop for home market. Red Cabbage is also preferable on good rich land.

	Oz.	¼ Lb.	Lb.
Volga. Very rapid grower, heads large, round and solid; heavy cropper. Can be set out late	\$.40	\$ 1.40	\$ 5.00
DANISH BALLHEAD, Solid Emperor Strain. A very fine strain of the genuine Danish Cabbage. Heads round (not flat) and deep green and very hard. Stems rather long. The best keeper45	1.30	5.00
DANISH BALLHEAD, Intermediate. Has shorter stems and larger heads than the Solid Emperor and is of deeper green color than the Short Stemmed strain45	1.50	5.50
DANISH BALLHEAD, Short Stemmed, or "Danish Round Head." Matures quicker than the Solid Emperor strain, has shorter stems and larger heads, but not of quite as deep green color45	1.50	5.50
Succession. A popular cabbage for fall market40	1.20	4.50
All Seasons. Large, flat heads45	1.50	5.25
Surehead. Deep, heavy heads. A good, late variety45	1.50	5.30
Premium Flat Dutch. Old standard kind. Large, heavy heads40	1.20	4.50
Fottler's Drumhead. Heads large and flat40	1.25	4.50
Winningstadt. Pointed heads of medium size45	1.50	5.50
RED DANISH STONEHEAD. A new red cabbage much like a red Danish Ballhead. Grows to a good size and heads evenly55	1.70	6.50
Mammoth Rock Red. Hard, round deep red. One of the best red cabbages for market or shipping55	1.60	6.00
HOLLAND EXPORT (Red). A new red cabbage from Holland. Heads medium early and very evenly, almost every plant making a perfect head. Not quite as large as Mammoth Rock Red, but matures earlier and more uniformly40	1.25	4.50
SAVOY, Perfection Drumhead. Heads large and quite firm45	1.40	5.00
SAVOY, Sutton's Best of All. Large heads, quite firm and of a deep green color. Produces the largest and most compact heads of any Savoy we know of45	1.50	5.50
CHINESE or "CELERY CABBAGE" (Pe-tsai)25	.75	2.50

**French's Success—the Best Celery
for Winter Use**

Photograph taken in April after the
Celery had been stored all winter.

FRENCH'S SUCCESS CELERY.

Harris' True Original Stock.

We do not know of any green celery quite equal to French's Success. The stalks are of good length, very thick, firm and brittle. When grown from our selected seed there are no soft stalks.

The keeping qualities of this celery are remarkable. It is not difficult to keep it in good condition well into March.

It is a better keeper than Columbia, and heavier, more uniform and more solid than Winter Queen and Giant Pascal.

There has been more money made with green celery than with the earlier kinds the past two seasons. It will pay to raise more of it if you get the right kind and the right seed. Beware of seed of this variety offered by other dealers. We know by our trials that all of it is far inferior to our own original strain, which we got from Mr. French himself over 15 years ago. **Oz. 60c; ¼ lb. \$1.75; lb. \$6.75.**

Mr. C. A. Baker, Milford, N. H., writes Feb. 21, 1919: "Your French's Success is the finest variety I have grown in the fifteen years I have been trying different varieties to get the very best. I tried a plot of five square rods and sold it at the rate of fourteen hundred dollars per acre. I had some of the finest Cauliflower I ever raised. Harris' Seeds are my choice to get the best for my select customers who know a good thing when they eat it."

CELERY, GOLDEN SELF BLANCHING

EXTRA FINE STRAIN, French Grown.

There is no finer strain of Golden Self Blanching Celery raised anywhere. This we can confidentially assert from our own trials and reports from our customers.

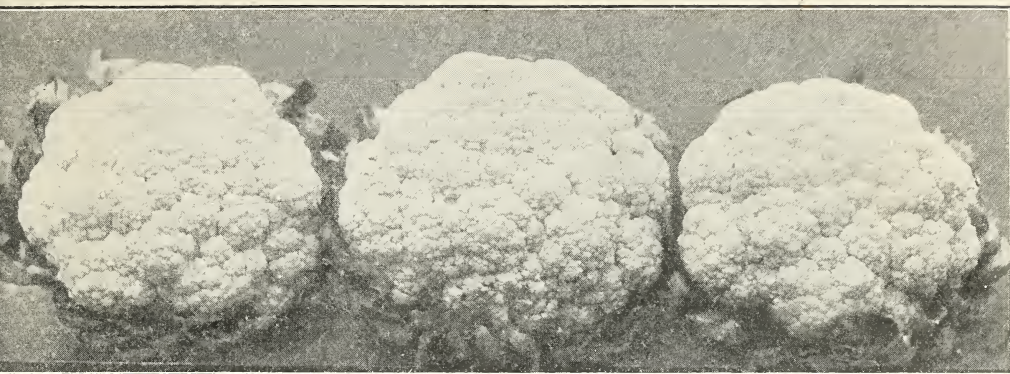

There is no more important thing about raising celery than the quality of the seed. There is always a lot of poor celery seed sold which causes heavy losses to the growers.

We have some seed that came to us direct from the originators, Vilmorin-Andrieux & Co., which will be found of the very highest quality. It produces solid, crisp stalks of the true "Self Blanching" type with practically no green stalks at all and no soft Celery. There is no finer strain of seed to be had at any price.

AMERICAN GROWN SEED. Seed grown in this country, if raised direct from French seed, often produces just as fine celery as the original French stock. We can offer this year seed grown in California in 1918 and from which we have raised enough celery to prove that it is good pure stock, free from soft stalks. **Oz. 45c; ¼ lb. \$1.50; lb. \$5.50.**

EASY BLANCHING CELERY

We find this new celery a first-class variety to follow Golden Self Blanching. It is of the same dwarf, compact habit of growth, blanches easily and quickly, and is of fine quality. The leaves are green and the stalks pure white when blanched. It is superior to the Golden Self Blanching in keeping qualities. We have kept a lot of it in good shape until spring, and set it out for seed. **Oz. 70c; ¼ lb. \$2.25; lb. \$8.00.**

“Perfected” Snowball Cauliflower (Photograph)

CAULIFLOWER

Snowball, of the best strain, makes large solid heads quite early. There is usually not much demand for cauliflower before September, so the plants should be set out from June 15th to July 10th. The later plantings usually produce the larger and firmer heads. “Danish Perfection” has more leaves than Snowball which protects the head better. It is a week or ten days later than Snowball, and a little earlier than Danish Giant or Dry Weather, which produces large solid heads, but should be set out earlier. Large Algiers makes loose, flat heads of large size and of high quality, but not of the best form for market.

There is no use in paying higher prices for Snowball Cauliflower. No better seed can be procured at any price.

	Oz.	¼ Lb.	Lb.
Snowball. Perfected strain	¼ oz. 60c	\$2.00	\$7.50 \$28.00
Danish Perfection. A new strain of Snowball Cauliflower with more leaves to cover the head, which does away with tying to a large extent. Heads very solid and without protruding leaves. Matures a week later than Snowball	¼ oz. 65c	2.25	8.00 30.00
Danish Giant Snowball or “Dry Weather.” Ten days or two weeks later than Snowball and of more vigorous growth and stands drought better	¼ oz. 65c	2.25	8.00 30.00
Erfurt Early Dwarf. Much like Snowball, but not quite so good.	¼ oz. 60c	2.00
Large Algiers. Large, rather loose heads, but of fine quality.	¼ oz. 35c	1.25	3.50

CELERY

Two-thirds of all the celery grown is Golden Self-Blanching, or “Paris Golden,” which is the same thing. This is the best variety for market up to January or February. For later use, the green varieties should be used. French’s Success is one of the very best and keeps longest. Columbia, if a good strain, is excellent.

GOLDEN SELF-BLANCHING or PARIS GOLDEN. Seed grown by the originator in France. It is the finest strain of this variety obtainable. See opposite page	Oz. \$1.00	¼ Lb. \$3.25	Lb. \$12.00
GOLDEN SELF-BLANCHING. American grown seed which has proved to be first-class and free from soft stalks45	1.50	5.50

CARROTS

Chantenay

Danvers

Chantenay is the best variety for market or table use. The root grows very smooth and not too long. Danvers' Half Long grows an inch or two longer and yields more, so is preferred when the crop is to be used for feeding stock. Oxheart makes a nice short, thick carrot for bunching. Early French Short Horn is very short, but grows rapidly and is best for forcing. All of these varieties are deep orange in color.

	Oz.	¼ Lb.	Lb.
CHANTENAY. The most popular market variety, 6 inches long, stump-rooted, deep orange color and very smooth....	.10	.25	.80
DANVERS' HALF LONG. Grows about 8 inches long, deep orange color all through; not quite as smooth as Chantenay. A heavy cropper and valuable for stock feeding and market10	.25	.75
Oxheart or Guerande. Short, thick carrots, used for bunching and table use. Very easily pulled. About 4 inches long, deep orange yellow, and of fine quality12	.30	1.00
MASTODON or WHITE VOSGE. Large white carrot for stock feeding. Immense yielder10	.25	.85
Long Orange. Roots a foot long, yields large crops12	.30	1.00

CRESS

Extra Fine Curled12	.30	1.00
WATER CRESS, Improved Broad-Leaved. Much better than common Water Cress45	1.75

"FRENCH ENDIVE"—WITLOOF CHICORY

A Neglected Opportunity. Gardeners have been slow to wake up to the fact that "French Endive" is one of the most profitable crops that they can grow. Some men who are alive to opportunities have made thousands of dollars in the past few years raising this crop.

We reprint below a part of an article which appeared in the "Florists' Exchange" some time ago.

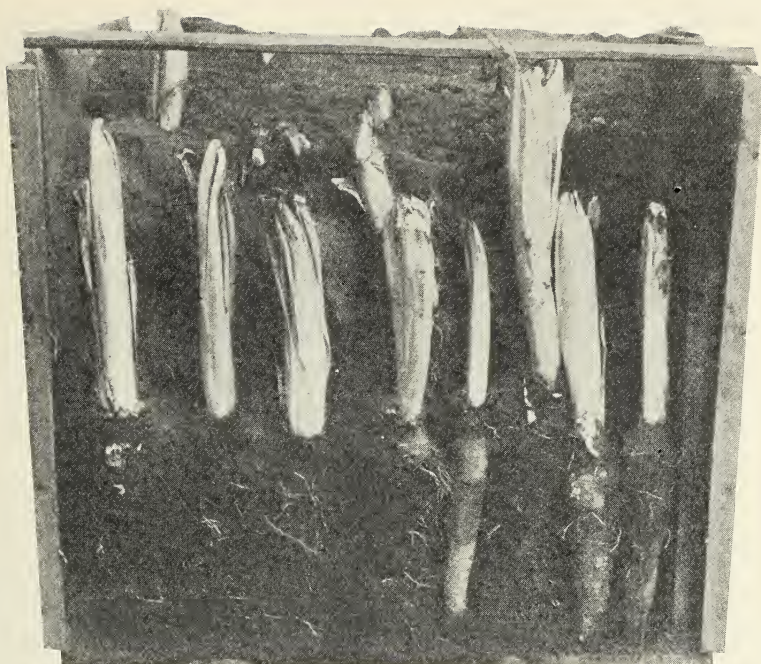

WITLOOF, or FRENCH ENDIVE

A crop which being grown cool, can add to your earnings this coming winter.

During the last five or more years "French Endive," or, as it is more correctly called, "Witloof," has been gaining in popularity as a late Fall and Winter salad. It often sells for 50c to 75c, or even \$1 a pound.

As with most other new things it is thought to be hard to grow. This is a mistake. The plants are as easy to raise as Parsnips or Salsify, for the seed may be sown at the same time, the plants cultivated and the roots dug and stored in the same way and with no more labor or risk.

In late Fall dig up so as to save at least 8 in. of each main root. Discard roots smaller than ¾ in. in diameter, cut off the tops so as to leave the stubs of the leaf stalks about an inch long. Store in a cold, moist cellar, or a "pit" such as used for Potatoes or Turnips. From this storage remove roots for forcing as needed.

Witloof Chicory grown in a box. The side of the box has been removed to show the root and heads as they look when ready to cut.

Preparatory to forcing trim each root to an even length—all to 8 in., 9 in. or 10 in.—so they will be uniformly deep when placed in forcing quarters.

Production of heads may be done out of doors, under the greenhouse benches, in the cellar or other convenient place. Indoors boxes 15 in. to 18 in. deep are often used. Butter tubs are excellent because they are not too heavy to handle when full of damp sand and roots.

A good place to force Witloof Chicory is in a cellar with a furnace so the temperature is kept at about 55° or 60°.

The fertility of the sand is of no importance, and the roots do not require anything except water. No light is required, although it does no harm.

The sand should be loose and not too wet. It is best to leave the top layer of sand dry if possible. Water thoroughly before placing the dry sand on top.

In about 3 or 4 weeks after placing the roots in the forcing box the long white heads of "Endive" will be ready to use. They may be cut as wanted. In the meantime other boxes or beds should be filled so as to give a constant supply during the winter months.

True Witloof seed important. There are other varieties of Chicory which do not produce good results, so it is important to get the true Witloof strain.

The seed we offer is of **our own growing** from seed imported from France, and we know it to be the true Witloof, and of a very fine strain. We forced a lot of the roots grown from the same imported seed last winter and they produced the finest, most compact heads we have ever seen.

Seed. Pkt. 10c; oz. 35c; $\frac{1}{4}$ lb. 90c; lb. \$3.75.

Roots for Forcing

We can furnish first-class Witloof Chicory roots ready for forcing at the following prices:

100 roots	\$ 1.50
500 roots	6.00
1000 roots	10.00

These roots can be shipped any time after December 1st. Forcing should commence in December and continue all through the winter. **Order roots early.** They can be kept in any cold cellar. Freezing does not hurt them if they are covered with a little sand.

A Wonderful New Early Sweet Corn

WHIPPLE'S EARLY

We introduced this corn last season and claimed it has the largest ears of any corn that matures so early. We have received many very flattering reports from gardeners who tried it and we are quite sure that all who grew it last season were more than pleased with it.

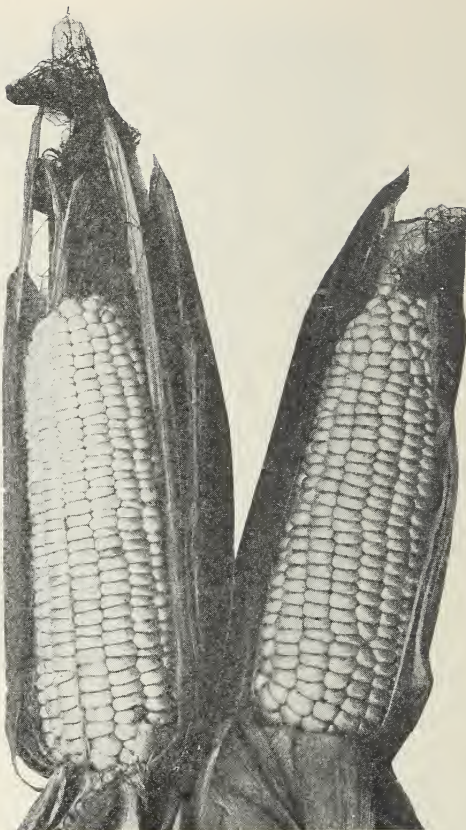

To describe it briefly it is like Stowell's Evergreen in size and shape, but matures **very early**—as early as Pocahontas and Red Cory, **much earlier** than Kendel's Early Giant, Metropolitan, Golden Bantam, etc. The quality of the corn is far superior to Evergreen, the corn being sweet, tender and delicious.

A profitable market variety—Think of putting on the market a big 16-rowed ear of corn as early as others are bringing in Cory! It sells on sight and at top prices. Fully half the stalks have two large ears even when planted quite close together. The yield therefore is immense.

We are indebted to Mr. Silas Whipple of Connecticut for this corn. Mr. Whipple deserves great credit for developing such a very remarkable variety.

In our opinion it is the **most valuable early Sweet Corn ever produced** and will take a prominent place in the list of varieties best suited for the market grower. Those who plant this corn **now** will reap the benefit.

The ears are 7 to 8 inches long and very large around, as they have 16 to 20 rows of good size kernels. Each ear is filled right out to the tip. The kernels are long and narrow like Evergreen.

Whipple's Early Corn

A Market Growers Opinions—

"I take this opportunity to congratulate you and Mr. Whipple upon Whipple's Early Sweet Corn. With me it has ripened about with Golden Bantam, but it is eared much heavier and the ears are twice as large. The quality is equal to Country Gentleman and is two or three weeks earlier. It is the best all-around corn that I have tried for the Northern latitudes." L. E. Johnson, Richfield Springs, N. Y., Sept. 4, 1919.

"I wish to say that your recommendation of Whipple's Early Corn was more than justified, as it seems to be a finely bred strain of the White Evergreen type coming in with Extra Early Pocahontas. Planted May 20th it was ready for market August 2nd. Wm. M. Kling, Sharon Springs, N. Y., Sept. 7, 1919.

We have but a limited stock of this new corn to offer this season so orders for it should be placed reasonably early. **Quart (1½ lbs.) 75c; 4 qts., (6 lbs.) \$2.50; peck (12 lbs.) \$4.00; bu. (48 lbs.) \$15.00.**

MIMMS' HYBRID SWEET CORN

This corn was originated by one of our gardener friends, Mr. J. W. Mimms. It is the largest and best medium early corn we know of.

The ears are very large, often nearly a foot long, with 10 to 12 rows of large white kernels that are very sweet and delicious. The ears are longer than Stowell's Evergreen and not quite so large around. They mature long before Evergreen and always command a good price in market on account of their large size and high quality. The stalks grow 7 feet tall and produce **nearly twice as many ears per acre** as the Evergreen.

Gardeners will do well to try this new strain. We are quite sure they will find it a valuable second early kind to come between the small extra early varieties and Evergreen. **Qt. 45c; peck (12 lbs.) \$2.50; bu. (48 lbs.) \$9.00.**

"The Mimms Hybrid Sweet corn is certainly fine. I have raised it two seasons and have had the best in the market."—E. B. Underhill, Poughkeepsie, N. Y.

"The Mimms' Hybrid corn sells for better money than any other kind on the Milwaukee market."—Alex. Cleveland, Milwaukee, Wis.

Buttercup Sweet Corn

BUTTERCUP SWEET CORN

The market in many cities now demands a **Yellow Sweet Corn** of the Golden Bantam type. The Bantam is small and does not yield well. In the Buttercup we have a corn that resembles the Bantam very much, but has ears **nearly twice as large** and **yields much more** while the quality is just as good or **better** and it matures at the same time as the Bantam.

The demand for Yellow Sweet Corn is increasing every year and it always brings higher prices in the larger cities than white corn.

After trying practically all the different kinds of Yellow Sweet Corn now being offered we are convinced that Buttercup is superior to any other that matures as early.

The Buttercup matures only a very few days after the small extra early kinds and the quality is superb. It is the **sweetest** corn we have ever eaten.

The ears are 8 to 10 in. long and have 8 to 12 rows. Many stalks produce two ears.

We offer seed of our own raising. It is of a "thoroughbred" strain and the germination is perfect.

Quart 45c; peck (12 lbs.) \$2.80; bu. (48 lbs.) \$10.50.

HARRIS' MAMMOTH WHITE CORY CORN

The EARLIEST Sweet Corn Grown

There are many varieties of Sweet Corn claimed to be the earliest. We have tried every kind we could get the seed of and planted it side by side with our strain of Mammoth White Cory on the same day. No kind has matured earlier and only one as early and this has much smaller ears.

Harris' Mammoth White Corn has good large ears 6 to 7 in. long, 8 to 10 rowed pure white and of fine appearance.

The stalks are small but often carry two large ears which grow quite low down. This corn is "Mammoth" only in the sense that it has much **larger** ears than the old Cory Corn.

This strain of Early corn will produce matured ears ready for market a day or two earlier than any other kind. There is no variety even with small ears that is a day earlier.

It is a profitable corn to raise because it gets on the market before any other kind and always brings the highest price. It sold as high as \$1.00 per doz. on the Rochester market the past season.

Seed of our own raising selected for earliness and large 10 rowed ears. Qt. 45c; peck (12 lbs.) \$2.80; bu. (48 lbs.) \$10.50.

"I bought from you one pint of Buttercup sweet corn and planted same 4 kernels in a hill. Family of 5 used all we wanted, sold 75 dozen ears at 20c. per dozen—\$15.00. I find this corn better than you recommended.

"It is sweeter than Golden Bantam. I have ears 11 inches long."—G. W. Stanton, Union Center, N. Y.

SWEET CORN

The earliest varieties have short ears. There is not over a day or two difference in time of maturity between Early Dawn, Mayflower and our Mammoth White Cory. There are strains of Cory that are later, but our strain of the Mammoth White Cory is as early as any corn grown.

A few days later comes Pocahontas and Whipple's Early with large, handsome ears. These have proved to be the most profitable varieties to raise for early market.

Kendel's Early Giant follows Pocahontas closely and has large ears. Metropolitan and Mimms' Hybrid have large ears, and are a few days later. Early Mammoth is as early as Stowell's Evergreen and has longer ears. It is a very fine late corn.

Our Sweet Corn is very carefully cured and is of strong vitality. The percentage that germinates in our tests is marked on the label of each lot we sell, so the planter can tell just how thick to plant.

HARRIS' PERFECTION CUCUMBER

Harris' Perfection Cucumber (Photograph)

This variety has been selected for many years with the idea of getting a cucumber as near perfection as possible, both for field culture and forcing.

The fruit is long, straight, smooth and handsome. The color is deep green with clear white rays on the blossom end. The cucumbers retain this deep green color longer than any kind we know of. The fruit will

average over a foot long when matured and many reach 15 inches in length.

For forcing this is an excellent variety. The vines are vigorous and wonderfully prolific and the fruit sets well when grown under glass.

Gardeners who have tried this variety for forcing report excellent results. We offer seed of our own growing. Oz. 20c; $\frac{1}{4}$ lb. 65c; lb. \$2.50.

IRONDEQUOIT HOTHOUSE CUCUMBER

The gardeners around Rochester have developed a very fine hothouse cucumber that has proved the most profitable variety to raise under glass.

The fruit is long, slender, deep green and nearly perfectly solid, there being very few seeds, and in some fruit none at all.

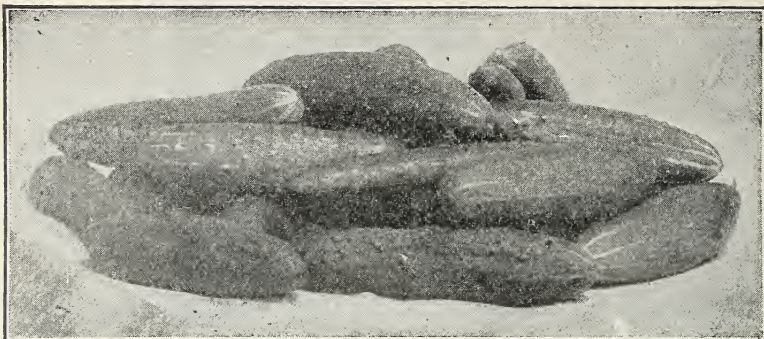

The vines are wonderfully vigorous and very prolific.

The seed we offer was saved entirely from fruit grown under glass. Packet of 50 seeds 60c; 100 seeds \$1.00; 500 seeds \$4.00.

CUCUMBER

The different strains of White Spine are by far the most popular market cucumbers for slicing or pickles. Of these the earliest is "Earliest of All" with short fruit. Early White Spine and Arlington are early and have fruit six to eight inches long when fit for the table. Davis' Perfect is a little later and the fruit is longer and of deep green color. Harris' Perfection is much like Davis' Perfect, but more even in shape and holds its color rather better. For pickles the most popular varieties are Green Prolific, Boston Pickling and Klondike which has longer fruit and is very prolific. Jersey Pickle is longer and deep green.

	Oz.	$\frac{1}{4}$ Lb.	Lb.
DAVIS' PERFECT. A carefully selected strain of White Spine, long straight fruit, very dark green and holds its color well. One of the best market varieties and also excellent for pickles. We have a very fine selected strain, far superior to ordinary stock.....	\$.12	\$.35	\$ 1.25
HARRIS' PERFECTION. The finest type of White Spine for open ground or forcing. Long, deep green, and of perfect shape.....	.20	.65	2.50

KOHL RABI

In some markets there is a good demand for Kohl Rabi. It is raised the same as turnips, but the seed should be sown in rows and the plants thinned to a foot apart. White Vienna is the best market variety

	Oz.	¼ Lb.	Lb.
Large Green. Used for stock feeding	\$.15	\$.55	\$ 2.00
Early White Vienna. The best variety for table use20	.60	2.20

LETTUCE

For forcing May King is an excellent head variety. It will stand more heat than Big Boston, and matures quicker. Big Boston is fine for cool houses and cold frames. For a curl leaf lettuce Grand Rapids is by far the most popular. Grows rapidly and the leaves stand upright so can be planted close.

For summer planting in the open ground, Iceberg, Unrivalled, Salamander, Holyrood Hot-Weather and Deacon are good. Big Boston is best for late summer and fall market and succeeds best on muck land. Does not stand heat as well as Holyrood and Salamander, which are best for mid-summer.

Romaine or Cos Lettuce can be grown both in the hothouse and open ground and is in good demand in many markets. Trianon Self-Folding is the largest kind; the heads often being nearly a foot high. Eclipse is shorter and forms the head earlier. Both do best in cool weather.

	Oz.	¼ Lb.	Lb.
Wayahead. Very similar to May King. Heads early	\$.12	\$.35	\$ 1.20
May King. A very early head lettuce for open ground or forcing....	.12	.35	1.20
HOLYROOD HOT-WEATHER. Large, firm heads. Stands well in the summer and is very slow to run to seed.....	.12	.35	1.35
SALAMANDER. Large heads, light green; stands well in hot weather ..	.12	.30	1.10
BIG BOSTON. Used largely for forcing and open ground on moist soil. Heads large and very compact. Our seed is very carefully grown from good firm heads only, and is equal to any seed obtainable at any price. 5 lbs. or more at \$1.10 per lb.....	.12	.35	1.15

SELECTED BIG BOSTON LETTUCE

Our strain of this lettuce is exceptionally fine. Heads uniformly solid and compact, and stand a long time without bolting. Some of the largest growers in this county are using Harris' Big Boston and find it equal if not superior, to any other stock obtainable at any price.

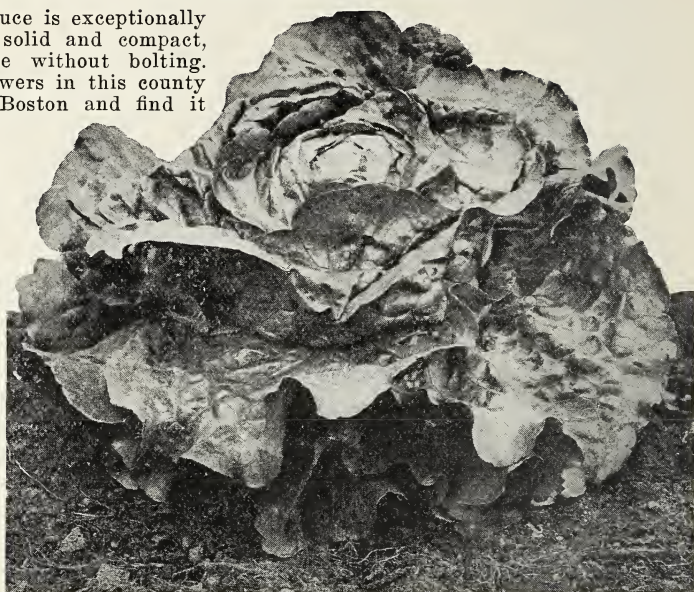

Oz. 12c; $\frac{1}{4}$ lb. 35c; lb. \$1.15; 5 lbs. or more \$1.10 per lb.

Mr. Roy L. Smith, a large grower at Cato, N. Y., writes:

"I sowed two acres with your Big Boston last fall and every one that saw it said it was the finest piece of lettuce they ever saw. It was the finest I ever raised."

Mr. M. E. Kerwin, an extensive lettuce grower of South Lima, N. Y., writes:

"Your Big Boston lettuce has done fine for me. About 50 members from Cornell University were in South Lima one day last summer and they told me your lettuce was the nicest stock they had seen there."

Big Boston Lettuce

	Oz.	$\frac{1}{4}$ Lb.	Lb.
UNRIVALED. Like Big Boston, but lighter green and without the red tinge; stands hot weather better. A fine summer variety. Called also "Long Lost," "Green Leaved Big Boston," "Cabbage Head Giant," and a dozen other names	\$.15	\$.45	\$ 1.60
DEACON. Large heads, smooth leaves, of finest quality. One of the best heading varieties12	.35	1.20
Wonderful. Very large firm heads; almost as large as Wakefield cabbage12	.35	1.20
ICEBERG. One of the best for open ground. Large, firm heads, curled and blistered leaves12	.35	1.20
Prize Head. Early, crisp, loose heads of good quality, tinged with brown, slightly curled12	.35	1.20
Grand Rapids. Of upright growth. Curled leaves. Valuable for forcing. Our strain is very fine.12	.35	1.20

BENDER'S SURPRISE MUSKMELON

A Grand Melon for Market and the Home Garden

We have raised muskmelons for many years, but have never seen a melon quite equal to the Bender in fine flavor, size and keeping qualities combined.

Mr. Bender's melons have a wide reputation for high quality among clubs and the best hotels. The seed was never offered by any dealer for a long time, but the public now has an opportunity to get seed that is of the genuine Bender strain which we have grown and selected for four years.

The flesh is deep orange, very thick, deliciously sweet and of high flavor. The flesh is very thick at the blossom end and the melons rarely crack.

The melons are of oval shape light green with coarse netting. When ripe the melons turn a golden tint which shows through the netting and gives the fruit a very attractive appearance.

The size of the melons averages quite large, many weighing 10 pounds and more.

A valuable point about these melons is that they will keep in good condition five or six days after picking, and actually improve in flavor during that time. The flesh is so firm and thick that the melons remain firm and in good condition much longer than other large melons of this class. For market and shipping this is an important consideration.

We offer seed of our own growing, and of a very fine selected strain that will produce melons of uniform shape and high quality. Pkt. 10c; oz. 35c; $\frac{1}{4}$ lb. \$1.10; lb. \$4.00.

IRONDEQUOIT MUSKMELON

Harris' Selected Strain

This melon has been grown for many years by market gardeners near Rochester.

The melons are nearly perfectly round, ribbed and covered with netting. The flesh is orange colored, thick, sweet and of the finest flavor. The melons grow quite large and are of handsome appearance. It is the finest strain of melons of the "Surprise" type we have ever seen except the new Bender's.

Gardeners will find this a profitable melon for the home market. The melons are so large, handsome and of such high quality that they sell readily and bring the highest price. The strain we have has been bred up to a high point so that a large percentage of the melons are of perfect shape, well netted and of high flavor. There is no finer strain of this variety to be obtained at any price. Seed of our own growing at Moreton Farm. Oz. 30c; $\frac{1}{4}$ lb. 90c; lb. \$3.75.

MUSKMELON

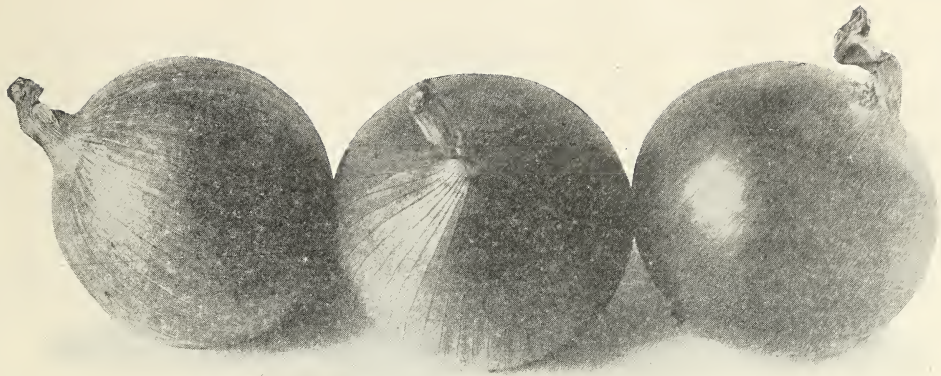

Nearly every market wants a different muskmelon. The Rocky Ford and Eden Gem or Paul Rose are probably the most popular in many markets, and are excellent melons for shipping. Admiral Togo is an improved variety of this class and better than the older types. Hoodoo is another good one of this class; small, firm, heavily netted and deep yellow flesh of high quality. Osage is in demand in some cities and is a large, handsome, round melon of high quality and good for near-by markets. Bender's Surprise is a new kind resembling the Irondequoit; but firmer and will stand shipping well. Emerald Gem is small, but very early and of high quality.

	Oz.	¼ Lb.	Lb.
Honey Dew. A melon that will keep two months after picking. It is shipped to eastern cities from California and the Southwest where it does well. It does not succeed here	\$.15	\$.40	\$ 1.50
BENDER'S SURPRISE. A fine new melon. See page 19.....	.35	1.10	4.00
IRONDEQUOIT. Large, round, netted; yellow flesh. The finest strain of the well-known Surprise Melon30	.90	3.75
HOODOO (New). A fine melon for shipping in baskets—small, round and well netted. Flesh orange yellow and of high flavor. Very firm and holds up well for a long time after picking.....	.12	.35	1.25
Long Island Beauty. Round netted, green flesh melon; popular in many markets12	.35	1.25
ADMIRAL TOGO. Oval, netted, flesh yellow and of finest flavor. Very prolific, medium size, slightly larger than Rocky Ford.....	.12	.35	1.25
Miller's Cream, or Osage. Oval, dark green, slightly netted, yellow flesh of fine flavor12	.35	1.25
EMERALD GEM. Small, round, green, slightly netted, yellow flesh of finest flavor; very early and prolific12	.35	1.25
PAUL ROSE. Fruit of medium size, oval netted and very firm. Flesh orange yellow and of high quality. A valuable melon for market and shipping12	.35	1.25
OSAGE, Perfected Strain. This strain of the popular Osage Melon has been bred up by a large melon grower by selecting the best type of melons for many years to save seed from. The melons are very uniform in shape and quality and far superior to the ordinary strain of this variety20	.50	1.75
ROCKY FORD (Netted Gem). Small, oval, netted, green flesh.....	.10	.25	.90
DELICIOUS GOLD-LINED ROCKY FORD. A very fine improved strain of the Rocky Ford melon. The flesh is green but has a yellow tinge about the seed cavity making it very attractive when cut15	.40	1.50
Hackensack. The standard, large netted, green flesh melon10	.30	1.10
Montreal. This is the famous Montreal Melon that sells for \$2.00 each. Grows to weigh 30 lbs. or more. We offer seed from the finest strain grown at Montreal. Pkt. 20c.			

WATERMELON

Harris' Earliest is valuable for the North because it will ripen before frost. For places south of New York City, Tom Watson and Kleckley Sweets are better because they are larger and of high quality.

	Oz.	¼ Lb.	Lb.
HARRIS' EARLIEST. The earliest large melon of fine quality. The best variety for the North	\$.10	\$.25	\$.90

GREEN CITRON, or Colorado Preserving. (Green seeds.) Used for preserves10	.20	.60

Yellow Globe Danvers Onion

ONION

Note.—Our Onion seed is all tested for germination before it is sent off, and the per cent. that germinates is marked on the label.

For market and storage a globe-shaped, yellow onion is usually preferred, although for some markets a red onion sells best. Yellow Globe Danvers is nearly round. Ohio Yellow Globe is slightly flattened on the bottom, and Southport Yellow Globe is more pointed at the bottom, forming an oval shape rather than perfectly round. These are the typical shapes for the different strains as they are supposed to be, but of course there are some onions of all these shapes in any of these different strains. The Danvers and Ohio strains are a little earlier than the Southport and are the most popular varieties. Round Yellow Danvers is flatter than the Globe and matures earlier. Prizetaker is larger than the Globe Danvers and a little later.

For pickles Early Barletta is best. The seed should be sown very thick so the onion will be small.

Special prices will be quoted on large lots of Onion Seed. Please write in stating what kind you want.

	Oz.	¼ Lb.	Lb.
YELLOW GLOBE DANVERS, Harris' Selected Strain. Our seed of this variety is grown from very carefully selected bulbs, and will be found much superior to the seed usually sold. It produces bulbs of uniform globe shape, deep yellow color and with small tops....	.20	\$.60	\$ 2.25
OHIO YELLOW GLOBE. A very fine strain of Yellow Globe Onion especially suited to muck land. The onions are globe shaped, but a little more flattened on the bottom than the Globe Danvers or Southport20	.60	2.25
ROUND YELLOW DANVERS. Earlier and flatter than Globe Danvers. A profitable onion20	.60	2.15
SOUTHPORT YELLOW GLOBE. A very fine strain of this onion grown from perfect globe-shaped bulbs of deep yellow color.....	.20	.60	2.40
PRIZETAKER. Large yellow onion of very handsome globe shape and mild flavor. Does not keep as well as Danvers. Fine for fall market20	.60	2.25
SOUTHPORT RED GLOBE, Harris' Special Selected. Large, perfectly round, deep red onion; keeps well and is the best red variety. Our seed is raised from carefully selected onions and will be found very fine25	.70	2.50
Early Large Red. Large, flat, red onion. Matures early and yields well30	.90	3.00
LARGE RED WETHERSFIELD. Very large deep red, flat.....	.25	.70	2.50
Southport White Globe. The largest and finest white onion. The seed we offer is of an extra fine strain30	.90	3.50
EBENEZER. A very fine round, yellow onion that will keep all winter and is of mild, pleasant flavor. The seed is used principally for raising sets, which when set out the following spring produce large, handsome ripe onions in July. Our seed was raised by one of the original growers and is the genuine Ebenezer.....	.30	.90	3.50
Australian Brown. Will keep the year around; matures early. The onions are flattened, of a golden brown color, and of fine quality..	.20	.60	2.25
WHITE PORTUGAL, or SILVER SKIN. Flat, white onion of mild flavor, early. Excellent for pickling30	.80	2.90
EXTRA EARLY BARLETTA. The best small white onion for pickling40	1.10	4.25

ONION SETS

White Sets make the whitest and most attractive bunching onions. The Yellow Sets are best to produce large dry onions very early.

White Velvet. Smooth, light green pods of medium length.....	\$.10	\$.20	\$.60
Perkin's Long-pod. Long, green pods of the best quality.....	.10	.20	.55

PEAS

The very earliest peas like Alaska and Surprise have small pods, but Thomas Laxton and Gradus are only three or four days later and have much larger pods. Laxtonian and Sutton's Excelsior are two days later than Gradus and have very large pods.

Duke of Albany, Alderman and Prince Edward are all strains of Telephone, but are better than the old type, having darker colored peas and large pods. Heroine is later and has long pods and is very prolific. Horsford's Market Garden is a great bearer, but the pods are rather small for market. Long Island Mammoth has very large pods, matures late and is not of as high quality as Telephone, which the pods resemble.

Note.—The crops of seed peas turned out so small the past season that we shall be unable to furnish more than half the normal quantities, and must reserve the right to reduce the quantities in any order. We shall try as far as possible to supply our customers who buy of us annually what seeds they require with what peas they actually need if used economically.

Early Varieties

	Qt.	Pk.	Bu.
Alaska. The earliest; very hardy and can be sown very early.....	\$.45	\$2.50	\$ 9.75
Surprise or Eclipse. Very early and of fine quality. Small pods.....	.60	3.40	13.00
First and Best. Extra early; pods three inches long, well filled....	.60	3.50	—

Champion, or Triple Moss Curled. Finely curled deep green leaves....	.10	.25	.90
Extra Double Curled. Not quite as fine as the above.....	.10	.25	.85
Turnip-rooted or Hamburg. We have a fine variety called "Thick Sugar" with smooth white roots of the best quality. Far superior to the common variety in both shape and quality.....	.10	.25	.90

HARRIS' NEW MODEL PARSNIP

Harris' Model Parsnip—Every One a Model. Photographed Exactly as Dug.

We have been improving the old Hollow Crown parsnip by careful selection for some years until we have obtained a very fine strain which we call "Harris' Model." The shape is shown in the photograph above.

The parsnips grow to a good length, but not too long. The roots are smooth, snow white, and have practically no side roots or prongs. Their whiteness is quite remarkable and gives the roots a very attractive appearance.

Our seed is grown from transplanted and very carefully selected roots and it will be found far superior to the seed usually sold. Oz. 15c; ¼ lb. 35c; lb. \$1.25.

From a very extensive gardener.

"I want Harris' Model Parsnip seed the same as you sent me last year. It is as fine as silk."—Del Titus, Irondequoit, N. Y.

"Your New Model Parsnips are head and shoulders above everything else. I have used your seeds for a number of years and they beat any seeds I obtained elsewhere, and I have used seed from all the leading Eastern seedsmen."—L. W. Brotzman, Broome County, N. Y.

Connecticut Field or Big Tom. The common yellow field pumpkin.....	.08	.20	.65

“HARRIS’ EARLIEST” SWEET PEPPER

The Earliest and Most Prolific Sweet Pepper.

Gardeners who have trouble getting peppers that will produce a good crop of fruit early enough for the Northern States should try **Harris’ Earliest**.

By far the earliest sweet pepper we know of. The fruit is of good size, resembling the Large Bell or Bull-Nose (but unlike that variety is mild and sweet). The peppers are bright red when ripe and very firm.

The plants are of dwarf, compact growth and are **literally covered with fruit**, there being often a dozen large ripe peppers on a plant at one time and many green ones.

The plants are very dwarf and compact, seeming often to be literally covered with fruit. They can be set out closer together than other varieties and an immense number of peppers are produced on a small amount of land.

It always produces lots of fruit and is so early that the fruit gets ripe long before frost. With this new kind you can get peppers on the market before any other growers have them.

We are improving the size and shape of this pepper every year. It is now much larger and of better shape than it was two or three years ago.

“Harris’ Earliest” Sweet Pepper (Photograph Actual Size)

Some gardeners tell us that we do not say enough about this pepper. They say they get more peppers from 100 plants than from 500 of any other kind that bears sweet peppers. Seed of our own growing. $\frac{1}{4}$ oz. 30c; oz. \$1.00; $\frac{1}{4}$ lb. \$3.75; lb. \$14.50.

Skaneateles, N. Y., July 24, 1919.

The Harris’ Earliest pepper I got of you is the earliest pepper I have ever seen. At this date, July 24, the plants are loaded with large fruit and also full of bloom.

Your Extra Early Earliana and Bonny Best tomatoes are also very good. We have picked several quarts of large smooth ripe tomatoes and the plants are completely loaded. Your strains of seed cannot be equaled anywhere.—John H. Withey.

Bangor, Pa., Feb. 12, 1919.

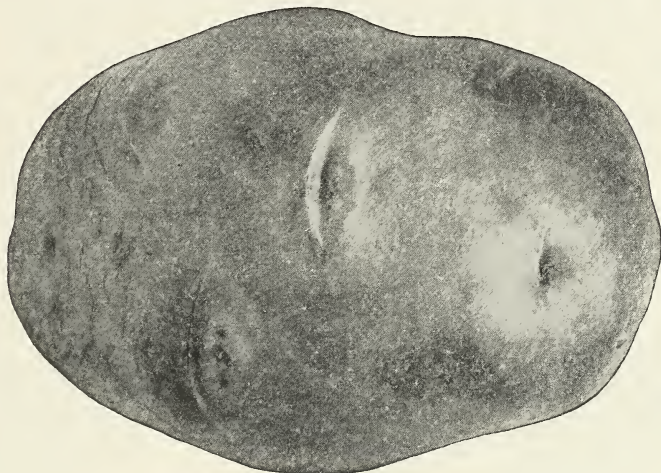

I have grown Harris’ Earliest Pepper for four years and think they are a real show to see how they bear and begin so young. I have been thinking for several years it is a pity you do not develop a yellow pepper like it. I have raised other yellow peppers, but they bear so few and so late they are not profitable.—John R. Rothcock.

PEPPERS

Giant Crimson and Chinese Giant are the largest peppers, but do not bear as well as the varieties with smaller fruit, such as Neapolitan and Harris’ Earliest which are also earlier. Of the two, Giant Crimson is more prolific and earlier with just as large fruit. Ruby King produces well and is a very large pepper, but somewhat late for the northern parts of the country. Harris’ Earliest has fruit as large as Bull Nose and is earlier, more prolific and the fruit is mild and sweet, which the Bull Nose is not.

HARRIS’ EARLIEST.	A wonderfully prolific and early sweet pepper	Oz.	$\frac{1}{4}$ Lb.	Lb.
	of good size. Will produce five times as many ripe peppers as any sweet kind we know of	$\frac{1}{4}$ oz. 30c..	\$1.00	\$3.75 \$14.50
GIANT CRIMSON.	As large as Chinese Giant, but earlier and more prolific. Very mild and sweet. The best of the very large varieties	.50	1.85	7.00
Ruby King.	Large, sweet, bright red. Fruit 5 to 6 in. high, 3 in. through45	1.50	5.50
Chinese Giant.	Immense peppers that are mild and sweet.....	.60	2.00	7.50

	Oz.	¼ Lb.	Lb.
NEAPOLITAN. Very early, medium size and mild. Very prolific and profitable for market. Fruit 3½ to 4 in. high and 2 in. through. Rather light green when young, bright red when ripe. One of the best sweet peppers for the northern states45	1.50	5.50
Sweet Mountain. A good size, round red pepper of slightly pungent flavor50	1.75	6.50
Large Bell or Bull Nose. Early, medium size, fairly mild and quite prolific45	1.35	5.00
Cayenne. Long, slim and very "hot"40	1.40
New Giant Cayenne. Much larger than the old Cayenne and equally pungent45	1.75
Golden Dawn. The best yellow pepper. Large and sweet.....	.65
Pimiento. Very thick, heavy fruit of medium size pointed at the bottom. Very deep green when young, bright red when ripe. Of mild flavor. Matures rather late, but plants are quite prolific....	.45	1.25	4.50

**New White Hebron
POTATOES**

About Shipping.—The potatoes are shipped in barrels or sacks holding 165 pounds. We can usually ship safely by the middle of March, but not before, except to the Southern States. If you wish them shipped in wooden barrels please add 35c to the prices quoted for sacks.

If seeds and potatoes are ordered, please state on the order whether the seeds are to be held to go with potatoes, or to be sent at once, and the potatoes later when it is safe to ship them. We cannot safely ship potatoes until the last of March.

Prices subject to change.—The prices here quoted are subject to changes of the market and to our acceptance on receipt of order. Prices will be quoted by letter at any time. Please state the kinds you are interested in.

Varieties.—Of the early kinds Early Six Weeks and Early Ohio are the earliest and are light pink in color. Irish Cobbler is a very early white potato. White Hebron, Early Michigan and Early Surprise are a little later, but yield more than the very early kinds.

	No. 1 Stock Single Bu. Sack 165 Lbs.	
IRISH COBBLER. The most popular round white early potato. Our stock is very fine, being pure and true to name	\$2.85	\$7.75
Early Ohio. The standard extra early potato. Light pink, nearly round with blunt ends	2.85	7.75
Early Six Weeks. Like Early Ohio in all respects, but yields better and is a little earlier. One of the very best extra early kinds....	2.85	7.75
White Hebron (New). A heavy yielder of long white potatoes; medium early. A profitable market variety	3.00	8.00
EARLY SURPRISE. Beautiful, large, smooth, round, white potatoes; medium early and a heavy yielder	2.50	6.75
EARLY MICHIGAN. Round white, medium early. The heaviest yielding early kind we know of	2.75	7.50
Todd's Wonder, Selected Strain. This selected strain of World's Wonder is one of the best late potatoes we have ever raised. Round to oblong, pure white and a heavy yielder, matures late.....	2.50	6.50

Heavy Weight. One of the heaviest yielders yet produced. Round to oblong, medium shallow eyes, purple sprouts, pure white skin. Very vigorous grower	2.50	6.75
GOLDEN RURAL. A new Russet potato, "blight-proof" and a heavy yielder under conditions when other kinds would fail. Potatoes round, smooth and handsome and of finest quality.....	2.75	7.00
DIBBLE'S RUSSET. A vigorous, healthy potato that yields well even in unfavorable seasons. Round, white with russet skin.....	2.40	6.50
MILLION DOLLAR. Round, smooth, white with shallow eyes. Heavy yielder	2.40	6.50
GREEN MOUNTAIN, JR. This new strain is superior to the old Green Mountain in uniformity, vigor and yield, often producing 250 bushels per acre	2.50	6.75

Harris' Special Scarlet Forcing Radish

WASHINGTON. Smooth, white, oblong and a heavy yielder. Grows very rapidly and matures medium early. A very fine variety for light soil. Single bu., \$2.50; sack (165 lbs.), \$6.75.

PAN-AMERICAN. Smooth, white, round potato, heavy yielder and one of the best varieties. Similar to Rural New Yorker, but better. Single bu., \$2.40; sack (165 lbs.), \$6.50.

RADISH

For forcing, Early Scarlet Globe and Earliest Scarlet Forcing are the most popular; the former is oval in shape while the latter is round. Both grow very rapidly. Crimson Giant Globe is similar to Early Scarlet Globe, but grows larger and requires a little more time to mature.

For the open ground, Early Scarlet Globe is excellent. Earliest Scarlet White Tipped is very handsome and resembles French Breakfast, which is more oval in shape. Icicle is a fine, long, white radish, smooth and of fine quality. White Strasburg and Giant White Stuttgart are large, white radishes for summer and fall use.

Earliest Scarlet Globe Short-leaf. Called also "Red Rocket," "Startle" and "20 Days." Oval shaped, of very rapid growth and valuable for forcing	Oz.	¼ Lb.	Lb.
.....	\$.12	\$.35	\$ 1.25
Early Scarlet Globe. The most popular variety for forcing and outdoor culture. Oval to round in shape, very bright red, flesh white, firm and crisp. Our seed is very fine10	.25	.85
Crimson Giant Globe. Very large forcing radish. Not so early as Early Scarlet Globe, but larger and stands longer without becoming pithy12	.30	1.00
Harris' Special Scarlet Forcing. Round, deep red, small leaves and extremely early12	.35	1.25
Earliest Scarlet White Tipped. Often called "Rosy Gem" and "Rapid Forcing." Same as above except that the radishes have white tips10	.25	.90
Icicle. Long, slim, white radish of very rapid growth.....	.10	.25	.90
Lady Finger or White Vienna. Long, slender white radish of fine quality. Excellent for forcing and open ground.....	.10	.25	.80
Long Scarlet Short Top. Excellent long radish for open ground.....	.10	.25	.85
Chartier. Grows 4 to 5 inches long with white tips.....	.10	.25	.90
French Breakfast. Oval, with white tips; early.....	.10	.25	.75
White Strasburg. Large, long, white summer radish.....	.10	.25	.85
Giant White Stuttgart. Very large, round or top shaped; white summer radish10	.25	.90

Winter Varieties of Radish

Sow in August and store in moist sand for winter market.

Chinese Rose. About 5 inches long, red skin, with white flesh of best quality	\$.12	\$.30	\$.95
Long Black Spanish. Skin black, flesh white and very solid, 6 inches long10	.25	.85
Black Spanish Turnip. Round or turnip-shaped roots10	.25	.85
California Mammoth White. Very large white radish; keeps well....	.10	.25	.80

RHUBARB or PIE-PLANT

	Oz.	¼ Lb.	Lb.
Myatt's Linnaeus. Early, large red stalks	\$.12	\$.30	\$ 1.10
Rhubarb Roots. Good roots \$4.00 per 100; \$35.00 per 1000.			

NEW "KING OF DENMARK" SPINACH

In our trial grounds we discovered that this new spinach from Denmark stood longer without running to seed than any other kind. Gardeners have long wanted a spinach of this kind. The Long Season was a step in the right direction, but now the "King of Denmark" far surpasses this kind both in size and long-standing qualities. It not only stands longer than any other kind, but it is also of the best quality. The leaves are deep green, thick, blistered or curled, and the plant stands up higher off the ground than the Long Season and Triumph and grows much faster and larger.

We are sure gardeners will find this a most valuable spinach for spring and summer sowing. It will stand 10 days after other kinds are gone. We are fortunate in being able to offer the seed at a very reasonable price this season. Ounce 15c; ¼ lb. 35c; lb. \$1.00.

SPINACH

Norfolk or Bloomsdale Savoy-leaf has deep green blistered leaves, but runs to seed very quickly. Long Season has similar leaves and stands much longer. The new "King of Denmark" is similar to Long Season, but is larger, stands up better and remains without running to seed longer. Viroflay is a very rapid grower and has long, somewhat pointed leaves not as thick as Eskimo, which does not grow quite so rapidly, but stands a longer time and is darker green. Victoria has round leaves and grows quite rapidly. For wintering over, we recommend Eskimo and Victoria, Long Season, all of which are hardy.

KING OF DENMARK. Stands longer in hot weather than any other kind. Thick, dark green leaves and grows to a large size	Lb. \$1.00
ESKIMO or GIANT THICK-LEAVED. An improved variety with very large, thick, dark green leaves; grows rapidly and stands well without running to seed. Hardy and an excellent kind for wintering over. 10 lbs. or more 35c per lb.....	.40
Victoria. Round, thick leaves, deep green and slightly blistered. An excellent kind for spring sowing. 10 lbs. or more at 40c.....	.45

New Long Season. Very deep green, round thick leaves, stands a long time without running to seed. 10 lbs. or more 40c per lb.	Lb.	
Norfolk Savoy-leaf. Round, blistered leaves. 10 lbs. or more 35c per lb.....		.45
LARGE THICK-LEAF VIROFLAY. Very large, pointed leaves, rapid grower and come on very early. 10 lbs. or more 35c per lb.40
Long Standing. Round, deep green leaves. 10 lbs. or more 40c per lb.....		.45
NEW ZEALAND. Not a true spinach. Valuable for summer. Oz. 10c; ¼ lb. 25c....		.80

SALSIFY or VEGETABLE OYSTER

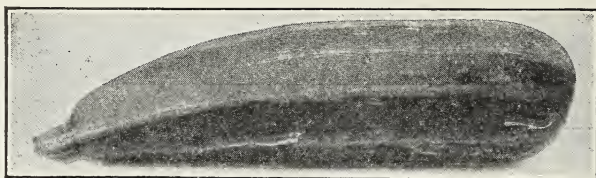

Mammoth Sandwich Island. The largest and best variety.....	Oz.	¼ lb.	Lb.
	\$.20	\$.65	\$ 2.50

SORREL

Improved Broad-leaved	\$.12	\$.40	\$ 1.40
------------------------------------	--------	--------	---------

SQUASH—Summer Varieties

The Giant Crookneck usually sells best in market, although Mammoth White Bush Scallop (called "Cymling" in the South) is in demand in many cities. The fruit is saucer-shaped and scalloped around the edge.

Italian Vegetable Marrow

Italian Vegetable Marrow, called also "Cocozelle" (Italian—"Zucchetta nana de Milano"), is now in much demand. The fruit is long, mottled, dark and light green, and grows on a bushy plant without runners. It is used when half grown.

Early Bush Crookneck. Most popular summer squash. Very early....	Oz.	¼ Lb.	Lb.
Giant Crookneck. Larger than the old Bush Crookneck	\$.12	\$.35	\$ 1.20
Mammoth White Bush Scallop. Large, flat, white fruit12	.30	1.00
Early Yellow Bush Scallop. Similar to the White, except in color...	.12	.30	1.00
ITALIAN VEGETABLE MARROW. Long, mottled green fruit of high quality15	.40	1.40

SQUASH—Fall and Winter Varieties

Boston Marrow and Prolific Marrow are the first to ripen and are excellent for market in the fall, but do not keep as well as the later varieties like Hubbard, Delicious and Quality, which can be kept all winter if put in a dry place where they will not freeze.

The Improved Warted Hubbard grows larger than the true Hubbard, and the shell is covered with lumps or "warts" making a squash that sells well in market, but we do not think the quality is quite as good as the true old Hubbard.

Delicious and Quality are both finer squashes than Hubbard, but do not yield quite as much and are profitable for market only where there is a demand for squash of high quality rather than size and appearance.

QUALITY. A new winter squash, small in size, but of very fine quality.	Oz.	¼ Lb.	Lb.
Better than any squash we know of	Pkt. 10c..	\$.30	\$.75
Boston Marrow. Popular fall squash, deep orange color08	.20	.70
Prolific or Orange Marrow. Very similar to above, but of deeper orange color. A valuable squash for fall market. Will yield nearly twice as much as Hubbard08	.20	.75
Essex Hybrid. Large, flattened at the ends, thick flesh of high quality15	.40	1.40
DELICIOUS. Smaller than Hubbard, but of finer quality.....	.15	.40	1.80
HUBBARD—True. Smooth, dark green fruit of high quality15	.40	1.30
Golden Hubbard. Deep orange yellow12	.30	1.00
Improved Warted Hubbard. Larger and more warted than the true Hubbard, but not of as fine quality15	.40	1.40

Harris' Special **EXTRA EARLY** Strain of **EARLIANA TOMATO**

We are quite sure that all our customers who raised our special strain of Earliana tomato the past season will agree with us that it is the **earliest and smoothest and best colored** stock of Earliana obtainable. This is a good deal to say, but we have tried all the best strains of Earliana and cannot find one that is quite equal to our own stock either in earliness or quality. There are other tomatoes offered under different names which are said to be earlier than Earliana, but we have found none to be any earlier than our strain and most of them are irregular in shape and not colored well. We have been working on our own strain of Earliana for many years and now we are getting it much better than it was some years ago.

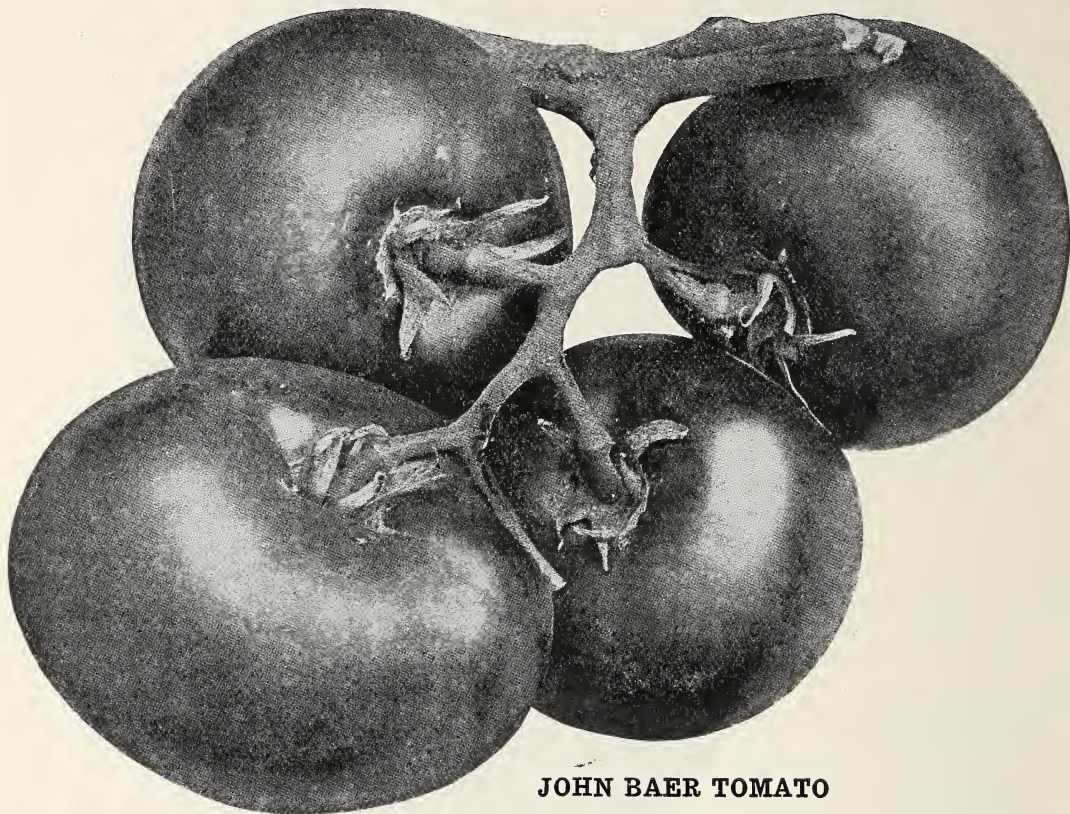

This special strain of Earliana is not only extremely early (there is no tomato earlier), but the fruit is perfectly smooth, very solid and firm and is well colored right up to the stem.

Gardeners find this a most profitable tomato to raise. The early crop brings high prices and the fruit that ripens later is of such good shape and color that it brings just as much as the later varieties.

We offer seed of our own growing at Moreton Farm. It is Northern Grown as we are on the north border near Lake Ontario. Ounce 45c; $\frac{1}{4}$ lb. \$1.20; lbs. \$4.50.

The Extra Early Earliana tomato seed that you sent me this year was the greatest Earliana that you ever sent me. I had the first ripe tomato on my table the 23rd of June. Sold several quarts before the 1st of July for 25c the quart. Am still selling them at the same price. I have got 120 plants in the patch. Have sold from the 120 plants so far over 70 quarts. Some of the specimens weigh one pound each. There are lots of my plant customers tell me they had ripe ones on the 4th of July. Your strain of the Ex. Earliana cannot be beat.—Alex. Baker, Montclair, N. J.

"I wish you could have seen our tomatoes while growing. There were no others in the surrounding country near so fine. You must have been careful to have your strains true to name. From Earliana and Bonny Best we had ripe tomatoes much in advance of others around us, and they were certainly fine. The Stone were splendid, but the frost took most of them. Large, smooth, perfect tomatoes, but many did not have time to ripen. In ordinary years the Stone is all right."—W. T. Craig, Limestone, Pa.

JOHN BAER TOMATO

We have improved our stock of John Baer so that it is now even better than when first introduced. We know of no other kind quite equal to it for second early or main crop. The fruit is large, smooth, deep red, and colors right up to the stem.

We never saw a finer crop of tomatoes than the John Baers we raised the past season. The vines were simply covered with big, smooth, handsome tomatoes and they all ripened before frost, although the plants were not set out until June 6.

The fruit is larger than Bonny Best and ripens equally early and the plants are more prolific.

We regard this new variety as the best medium early tomato for market or canning. Seed of our own growing from very choice fruit. Oz. 35c; $\frac{1}{4}$ lb. 95c; lb. \$3.75.

BONNY BEST TOMATO

This tomato is much like the John Baer. Our selected strain has very smooth, handsome, bright red fruit of good size and well colored.

The fruit does not often crack and we did not see a single one affected with black rot in a large field we had growing at Moreton Farm.

One good point about this tomato which is not possessed by the John Baer is that the stem comes off the fruit when picked, so does not injure other tomatoes when they are packed together.

We are sure there is no finer strain of Bonny Best tomato than the seed we are offering this season. It was saved from very carefully bred plants and practically every fruit was of perfect color and shape. Oz. 35c; $\frac{1}{4}$ lb. 95c; lb. \$3.75.

SUCCESS TOMATO

We have been raising and selecting a strain of Success tomato for 10 years or more and now have it bred so true that practically every plant produces almost perfect fruit; large, well colored, smooth and solid.

There is no better late or main-crop tomato that we know of. The fruit is as large, smooth and heavy as Stone while it ripens a week or ten days earlier. This is a great advantage for the northern parts of the country where Stone is too late to ripen the whole crop. Seed of our own growing at Moreton Farm. Oz. 35c; $\frac{1}{4}$ lb. 95c; lb. \$3.50.

TOMATOES

HARRIS' SELECTED TOMATO SEED

Harris' Tomato Seed is becoming famous for its high quality. This is the result of many years' careful work in breeding up fine strains by selecting fruit from plants that produce the best and earliest tomatoes. Our strains of the leading varieties will be found far superior to other strains sold under the same names.

The very earliest tomatoes are never quite as large and well colored as the later varieties, but Earliana of a carefully selected strain is the nearest perfect of any really early variety we know of. The Harris' Extra Early Earliana is earlier than the old strain, and also colors better. John Baer, a new variety, has proved to be about a week later than Earliana, ripening with Bonny Best and has larger fruit than that excellent variety. Chalk's Jewel is a little later and larger. Success is still later and is like Stone, but ripens sooner than that variety.

Of the pink varieties, June Pink is the earliest and resembles Earliana, except in color. Early Detroit is a little later, but has large, smooth, well-colored fruit. New Globe is a few days later and the fruit is as round as an apple. Ponderosa is very large, but irregular and does not color well around the stem and is not suitable for market. Trucker's Favorite is large, smooth and one of the best late pink varieties for market or shipping.

	Oz.	¼ Lb.	Lb.
Extra Early Earliana (Harris' Special Strain). A selection from our stock of Earliana which ripens a week earlier than the old variety. Fruit is well colored, smooth and very solid. Will be found of great value and profit to gardeners who use it. Seed of our own growing from the best fruit only	\$.45	\$ 1.20	\$ 4.50
JOHN BAER. Large, smooth fruit, colors perfectly; bright red all over; does not crack; very prolific. One of the best second early kinds	.35	.95	3.75
BONNY BEST. Very early, large, smooth and bright red with no green around the stem. The fruit is so smooth, solid and well colored that it sells for the highest prices in market in competition with later varieties	.35	.95	3.75
June Pink. Very similar to Earliana except as to color, which is pink like Beauty	.35	.90	3.50
EARLY DETROIT. An early pink variety with smooth evenly colored fruit of good size. Earlier than Trucker's Favorite and other smooth pink varieties	.30	.85	3.25
CHALK'S EARLY JEWEL. Early, smooth and well colored. Our strain of this tomato is very fine	.30	.85	3.25
SUCCESS. Very fine main crop variety. Smooth, well colored and solid. Earlier than Stone and quite similar to that variety. Seed of our own growing; very fine	.35	.90	3.50
STONE. We have a very fine strain of this grand tomato. There is nothing finer than a first-class strain of Stone, but it ripens rather late for the most northern parts of the country. Seed of our own growing at Moreton Farm	.25	.80	3.25
NEW DWARF STONE. Plants like Dwarf Champion with fruit like Stone, very prolific and a valuable variety	.30	.85	3.25
TRUCKER'S FAVORITE. Large, smooth, pink, medium late	.30	.75	2.85
Enormous. Immense, heavy, deep red fruit of fair quality	.40	1.25
Imperial. One of the best pink tomatoes for main crop	.30	.80	3.00
GLOBE (Livingston's). As round as an apple; color deep pink. One of the very best varieties of this color	.25	.75	2.75
PONDEROSA. Magnificent, heavy, solid fruit, often weighing 2 lbs. or more; light pink; medium early; does not color well	.45	1.25	4.75
Dwarf Champion. Early, pink, medium size, dwarf plant	.30	.80	3.00
Livingston Beauty. Large, late, pink, very smooth	.25	.75	2.75
Livingston's Favorite. Large, smooth, handsome fruit; deep red	.25	.75	2.85
Red Cherry. Very small red fruit in clusters	.35	.95
Yellow Plum. Plum shape, small yellow fruit	.30	.85
Red Pear or Fig. Small pear-shaped red fruit	.30	.85
GOLDEN QUEEN. Large, smooth yellow fruit	.30	.85
Ground Cherry or Husk Tomato. Yellow fruit in husks	.30	.85
Superb Salad. Small, very smooth red fruit suitable for serving whole in salads. Very prolific	.40	1.00
WEST'S PEERLESS FORCING. A valuable variety for growing in greenhouses. Of medium size, colored well and bears well under glass	¼ oz. 25c	.80

Purple-Top White Globe Turnip

TURNIPS

Early Milan, both the Purple Top and White, grows very rapidly and is the first to mature. The next is Purple Top Strap-leaf, which is very similar but a little later. Purple Top White Globe is a little later but a much better turnip and is the most popular variety for market. White Egg is a handsome white egg-shaped turnip, and Golden Ball a nice, smooth, round, yellow variety which grows rapidly. Snowball is round in shape like Golden Ball, but snow white. Yellow Stone is larger and more flat, while Yellow Aberdeen is globe-shaped and grows to a larger size, but is better suited for feeding stock than for market.

	Oz.	¼ Lb.	Lb.
EARLY WHITE MILAN. Very early, flat, white turnip	\$.15	\$.50	\$ 1.75
Early Purple Top Milan. Like Strap-leaf but smaller and earlier.....	.15	.40	1.50
PURPLE TOP WHITE GLOBE. Like Strap Leaf, but round instead of flat. Very fine fall turnip08	.20	.70
PURPLE TOP STRAP-LEAF. White, purple top, flat, very rapid grower08	.20	.75
Snowball. Pure white, round as a ball; early, with small tops.....	.10	.25	.85
White Egg. Pure white, globe shape10	.25	.90
White Flat Dutch. Pure white, flat10	.25	.90
GOLDEN BALL. Round, smooth, yellow08	.20	.75
Cowhorn. Long, white, green top08	.20	.75
Yellow Stone. Very firm, round, light yellow, medium early10	.25	.95
Yellow Aberdeen. Large, round yellow turnip; very firm and keeps a long time10	.25	.95

RUTA BAGAS OR SWEDE TURNIPS

	Oz.	¼ Lb.	Lb.
White Short Top. White with very short tops. An excellent table turnip	\$.15	\$.40	\$ 1.50
Breadstone. Small, oval, white turnip for table use15	.40	1.50
Macomber. A small white purple top Swede of fine quality for table use. Not a market variety45	1.40
PERFECTION SELECTED SWEDE. A fine selected strain of purple top yellow ruta бага. Grows large but is very smooth and of fine grain10	.30	1.00
Imperial Purple Top. Large, yellow, smooth and a heavy yielder....	.10	.25	.90
White Sweet or French. A good White Swede turnip12	.35	1.10

HERBS FOR FLAVORING, Etc.

	Oz.	$\frac{1}{4}$ Lb.	Lb.
Basil. Used for flavoring soups and sauces. Plant about 18 inches high. \$.15	\$.40
Borage. Often used for bee pasture. Sow in spring in the open ground	.12	.35	1.25
Caraway. Hardy biennial seeding the second year after sowing. Sow in spring or fall10	.25	.75
CORIANDER. Sow in the spring in the open ground10	.25	.75
DILL. Used for flavoring cucumber pickles, etc.10	.25	.75
SWEET MARJORAM. Easily grown from seed sown in the open ground in the spring30	.80	3.00
Fennel (Sweet). The leaves are used for flavoring. Easily raised..	.10	.25	.90
Summer Savory. Easily grown by sowing seed in the open ground in the spring. Plant grows about a foot high with small, narrow leaves, which are dried on the stems and used for seasoning.....	.25	.60	2.25
SAGE, Broad-Leaved. When once started will last for years. Should be in every garden. Sow in the open ground and thin the plants to six inches apart25	.85	3.25
Thyme. The plant will survive the winter if given a little protection	.30	.95	3.50
WORMWOOD. A medical herb used largely for planting in poultry yards for chickens to feed on40	1.00	3.75

VEGETABLE PLANTS, ROOTS, ETC.

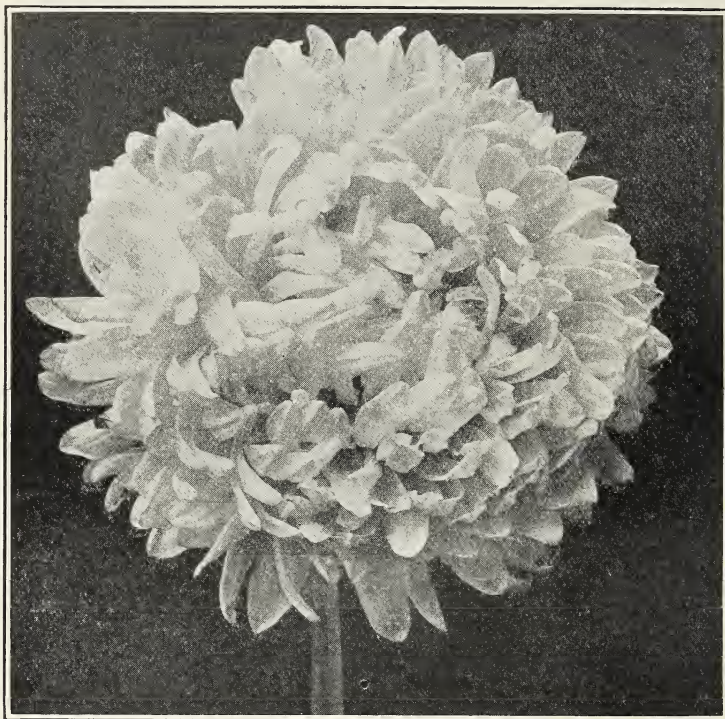

All plants will be ready for delivery when they can be dug in the spring, unless otherwise stated. We usually cannot dig plants before the 10th of April.

	100	1000

HARRIS' FLOWER SEEDS

The varieties named in this list are those best suited to raise for market. Many of the seeds are of our own growing and all are of the best quality both as to germination and purity. For complete list of flower seeds see our retail catalogue.

Please order by number as it will help us in filling your order.

Royal White Aster

We raise a lot of Aster seed on our own farm and have some very fine strains especially suited to Florists' use.

ASTERS

		¼ Oz.	Oz.
150—	Queen of the Market, White. The earliest aster to bloom and on this account often the most profitable to raise for market. By starting the plants early in frames the flowers can be cut in July.....	\$.35	\$ 1.25
168—	Queen of the Market, Pink. Of a light flesh pink, not quite as good a flower as the white40	1.50
164—	Royal, White. The Royal asters are early and have large, well formed flowers on long stems. They bloom two weeks earlier than Peerless Pink and that type, and are probably the most profitable asters to raise for market. We have a very carefully bred strain that will be found far superior to ordinary seed of this variety. The flowers are of the Branching type with incurved petals and show no yellow centers when well grown..	.40	1.50
165—	Royal, Purple. Same as the Royal White, except in color, which is a deep rich purple. Plant more upright35	1.25
162—	MORETON PINK. A beautiful new pink aster of the "Rochester" or "Crego" type and of a rich clear pink, much deeper than Peerless Pink. See page 36	¼ oz. \$.70	1 25 4.50
163—	LAVENDER ROCHESTER. This is by far the handsomest lavender aster we have seen. Flowers are simply immense, 5 inches across and of the most beautiful form with long twisted petals and showing no yellow center. Grows on long stems and will be found a most desirable aster for market	\$.75	\$ 2.50

Peerless Pink Aster

166— PEERLESS PINK. The finest light pink aster for market. Very large flowers of fine form, and produced on long stiff stems. The flowers are of great substance and stand handling well	$\frac{1}{4}$ Oz.	Oz.
157— LATE BRANCHING, WHITE. The most popular aster for market. Always in demand. Our strain is exceptionally fine, producing large, full flowers without yellow centers45	1.75
158— Late Branching, Rose. Same as above, except in color, which is deep pink or rose. One of the best rose colored asters.....	.30	1.00
159— Late Branching, Lavender. A very handsome Branching Aster with large flowers of a clear shade of bluish lavender35	1.25
160— Late Branching, Mixed Colors. A mixture of all the above colors of Late Branching Asters30	1.00
170— Mammoth Branching, White. An improved strain with immense flowers on very long stems. Plant very vigorous and the flowers are perfectly full and considerably larger than common Late Branching White.....	.50	1.75
171— AMERICAN BEAUTY, ROSE. A grand new aster. See next page....	.35	1.25
172— AMERICAN BEAUTY, PURPLE. Very large, handsome new purple aster. See next page75	2.50
154— Violet King. Deep lavender purple; narrow petals; large full flowers...	.60	2.00
173— WHITE KING. One of the very handsomest white asters, large handsome flowers with narrow graceful petals60	2.00
155— Rose King. Deep rose pink, fine60	2.00
156— Semple's Pink Branching (or Mary Semple). Flesh pink; full flowers with long petals. One of the very best varieties; stands handling well..	.30	1.00

MORETON PINK ASTER

162—The Moreton Pink is the first really fine deep pink aster. There are rose-colored asters, but this is not a rose color. It is a pink like Peerless Pink or Semple's Pink Branching asters, but deeper, richer and more glowing.

The plant is of branching habit and the stems when well grown are 18 in. to 2 feet or more in length. The flower is of the Rochester or Crego type, and blooms with these varieties, being earlier than the late Branching Asters.

Florists will find this new aster a most valuable addition to their stock. It is a new color in asters and a most attractive one.

Packet 15c; $\frac{1}{8}$ oz. 70c; $\frac{1}{4}$ oz. \$1.25; oz. \$4.50.

AMERICAN BEAUTY ASTERS

This is a new variety from California and is certainly very handsome. The plants are unusually vigorous and produce a profusion of very large full flowers on long strong stems. The flowers are of the "Perfection" type with incurved petals making them almost globe shaped. This will prove a very fine aster for cut flowers for near-by market or shipping. We can offer two colors: rose pink and purple.

171—American Beauty, Rose. $\frac{1}{4}$ oz. 35c; oz. \$1.25.

172—American Beauty, Purple. $\frac{1}{4}$ oz. 75c; oz. \$2.50.

SENSATION ASTER

169—This new aster is one of the handsomest deep red varieties we have seen. The color is a deep glowing garnet red.

The flowers are about $2\frac{1}{2}$ inches across, perfectly full and show practically no yellow center. They have long, wiry stems and make excellent cut flowers. 1-16 oz. 25c; $\frac{1}{4}$ oz. 75c; oz. \$2.75.

AQUILEGIA OR COLUMBINE

1/8 Oz. Oz.

Very useful for cut flowers if good varieties are raised. Hardy perennial.

- | | | |
|---|------------------|---------|
| 140— Chrysantha. Long-spurred, large, handsome yellow flowers. A charming variety | \$.35 | \$ 2.50 |
| 141— LARGE FLOWERING HYBRIDS. Very large flowers with long spurs which add greatly to their grace and beauty. The colors are shades of blue, pink, and yellow | .20 | 1.50 |
| 143— MRS. SCOTT ELLIOTT'S LONG SPUR STRAIN. A very choice selection of varieties with the longest spurs and most attractive colors. The long graceful spurs add greatly to the charm of these flowers. There are no finer Columbines grown | 1-16 oz. 50; .90 | — |
| 144— DOUBLE, MIXED COLORS. The double-flowered kinds are not as large as the single varieties, and in our opinion are not as handsome..... | .10 | .35 |

CORNFLOWER

or

BACHELORS' BUTTON

- 215—**NEW DOUBLE BLUE.** This new strain of Cornflower has proved very profitable for cut flowers, especially when forced. The flowers are much larger than the old cornflower and are quite double and a clear "cornflower blue." Seed of our own raising from best double flowers only. Far superior to any other strain we have seen. Ninety per cent. of the flowers are large and double. \$.25 \$.75

- 216—**Double Mixed Colors.** Double flowers of various colors, including pink, white, light blue. Very attractive and make fine cut flowers20 .65

CANTERBURY BELLS

Seed should be sown in the early summer to produce plants that will flower the following spring.

- | | | |
|--|--------|--------|
| 290—Single Blue | \$.12 | \$.30 |
| 291—Single White | .12 | .30 |
| 292—Single Rose | .15 | .35 |
| 294—Single Mixed Colors | .12 | .30 |
| 293—Cup and Saucer, Calycanthema. Very handsome. Mixed colors..... | .30 | 1.00 |

Calendula, Orange King

CALENDULA, OR POT MARIGOLD

There is no more useful annual flower for the florist than this.

It will bloom in the open ground the whole season and is easily forced.

	Oz.	
241—Orange King. Large, full deep orange flowers. The most useful variety20
240—Mixed Colors15

CANDYTUFT

	$\frac{1}{4}$ Oz.	Oz.
270—Empress. Large spikes of pure white flowers. The largest variety12	\$.35
272—White Rocket. The heads of flowers are flatter than the Empress and not quite so large10	.25
273—Mixed Colors10	.25

CALLIOPSIS

These well-known annuals make attractive cut flowers. The variety "Crown of Gold" is especially suited to this purpose.

250—Golden Wave. Large yellow flowers on low plants 15 in. high	\$.10	.25
252—Crown of Gold. Large pure yellow flowers on long wiry stems. Splendid for cutting and handsome garden plants10	.30

COREOPSIS

340—Lanceolata Grandiflora. Hardy perennial with large yellow flowers on long stems; very useful for cutting20	.55
--	-----	-----

COSMOS

The new large flowering strain of Early Blooming Cosmos we offer produces a wonderful display of very large flowers often 3 inches across and of various colors from white to deep red. They commence flowering in July when the seed is sown in the open ground in May.

	$\frac{1}{4}$ Oz.	Oz.
350—Early Flowering Giant. The earliest and best cosmos. Seed of our own growing of a very fine large-flowering strain15	.50
352—Lady Lenox. Large, late variety with shell pink flowers15	.50
351—Mammoth Flowering, Mixed Colors. Very late. Must be forced to get bloom in the north15	.50

DOUBLE DAISY—BELLIS

These plants always sell well in the spring. Seed should be sown in July or first of August. This will give plants that flower early in the spring. Treat the same as pansies.

230—Mixed Colors. Pink, white and rose color	\$.30	\$ 1.00
--	-------	---------

DIANTHUS or PINKS

385—Double Japan Pink (Dianthus Heddwigi)	\$.15	\$.40
388—Double Japan Pink, Fringed. Very handsome15	.50

DELPHINIUM or LARKSPUR

Both the annual and perennial delphiniums are very useful for cut flowers and usually prove profitable to raise for this purpose.

Perennial or Hardy Larkspur

	$\frac{1}{4}$ Oz.	Oz.
377— Harris' Special Mixture. This seed was saved from plants that produce very fine spikes of flowers. Many are of light shades of blue, while others are of deeper color. All have very long heavy spikes. Such seed is usually hard to procure	\$.60	\$2.00
376— Chinese. Grows 2 feet high with large light blue flowers.....	.20	.65

Annual Larkspur

Flowers in August from seed sown in the open ground in the spring. The flowers are double and of many beautiful colors.

510— Tall Branching Stock-flowered, Mixed Colors. Plants 4 feet high with long spikes of pink, blue, red and white double flowers.....	.15	.50
511— Lustrous Carmine or "Newport Pink." A very attractive shade of deep pink20	.65

EVERLASTING or "STRAW FLOWERS"

These flowers are easily raised and there is often a great demand for them. They are annuals and flower early when seed is sown in the open ground.

Foxglove

	$\frac{1}{4}$ Oz.	Oz.
105— ACROCLINIUM—Double, Mixed Colors. Small double red, white and pink flowers on stems a foot or more in length15	.40
220— HELICHRYSUM—Double, Mixed Colors. The flowers are 2 inches across and stand on stems two feet long. The most popular "Everlasting"12	.35
370— Xeranthemum—Small, semi-double flowers with silvery foliage. Plants grow 2 feet high20	.60

FOXGLOVE (Digitalis)

The plants of Foxglove are always in demand and gardeners find it profitable to raise them. The seed should be sown in June or July. Hardy perennial, flowering the second year from seed.

	$\frac{1}{4}$ Oz.	Oz.
445— Gloxinioides, White. Very large white flowers with small colored spots on the inside	\$.25	\$.75
446— Gloxinioides, Mixed Colors20	.60

FORGET-ME-NOT—MYOSOTIS

There is always a great demand for these plants in the spring. They can be grown the same as pansy plants by sowing the seed in August or September.

436— Royal Blue (Alpestris). Large flowers of a deep blue with white center or eye25	.75
435— Palustris—Very compact bushy plants with true "Forget-Me-Not blue" flowers. Very hardy50	1.75
437— Mixed Colors (Alpestris). A mixture of all the Alpestris or tall growing kinds20	.70

GAILLARDIA

The single gaillardia is a hardy perennial, and is always in demand as cut flowers. The double form is an annual, very pretty in the garden and excellent for cutting. Flowers in July.

	¼ Oz.	Oz.
455— Single, Large Flowering (Grandiflora). Flowers 3 to 5 inches across; deep red in the center bordered with gold. Stems two feet long.....	\$.15	\$.45
456— Double (Lorenziana). Colors range from creamy white to deep yellow and red12	.35

GYPSOPHILA—BABY'S BREATH

Both the annual and perennial or hardy gypsophila are very useful to arrange with other flowers. The flowers are always in demand and are easily raised.

470— Elegans Grandiflora . The annual Baby's Breath. Plants 2 to 3 feet high. White flowers	¼ lb. 30c.	..	.15

576— Madame Gunter's Hybrids . Very handsome varieties of tall nasturtiums of various rich colors10	.30	1.00
577— Tall . Mixed colors10	.25	.85
585— Dwarf . Mixed colors10	.30	1.00

PANSIES—Johnson's Giant (Ruffled) (Photograph)

PANSY

Fine pansy plants can be raised by sowing the seed in February or March in flats in the greenhouse or frames. They are also raised by sowing seed in August and held in cold frames through the winter.

	¼ Oz.	Oz.
626— MASTERPIECE, or Giant Ruffled. Very large flowers with fluted petals. The colors are rich purples, yellows and maroon in many beautiful combinations	\$1.25	\$ 4.50
625— JOHNSON'S GIANTS. We consider these the finest pansies we have seen. The flowers are of the largest size, of beautiful color and markings, and with fluted or ruffled petals	1.75	6.50
628— Giant Trimardeau. Very large flowers, but of the more common colors. The plants make a strong growth and produce an immense number of flowers60	2.00
627— Harris' Special Mixture. Made up of many of the best varieties with largest flowers of excellent colors. A really fine mixture.....	.90	3.50
632— Snowflake. A clear white pansy of large size70	2.50
633— Golden Yellow. Clear yellow with dark eye, very large70	2.50
634— Mixed Colors. Flowers not as large as the better mixtures described above30	1.00

PHLOX DRUMMONDI

Phlox are very useful for beds and borders where they make a brilliant show of flowers all summer even after hard frost.

680— Brilliant Scarlet	\$.25	\$.90
681— Pure White25	.90
682— Mixed Colors20	.70

Harris' Perfection Double Petunias

PETUNIAS

		500 Seeds	1000 Seeds
651— RUFFLED GIANTS , "Fluffy Ruffles." Very large, single flowers with beautiful ruffled edges. The colors are of many shades of pink, violet, etc.			
	Pkt. of 200 seeds \$.30	\$.60	\$1.00
650— HARRIS' PERFECTION DOUBLE . These are really very remarkable petunias. The flowers are often 4 to 5 inches across, perfectly double and beautifully fringed at the edges of the petals. And eight out of every ten plants produce double flowers. This is a larger proportion of double flowers than we have ever been able to produce from seed before.			
	Pkt. of 200 seeds \$.50	1.10	2.00
653— Fringed Hybrids . These are beautiful single petunias for bedding. The flowers are not quite so large as the Ruffled Giants, but are much larger than common petunias and the edges of the petals are beautifully fringed		.20	.35
652— GIANTS OF CALIFORNIA . Immense single flowers with fluted edges, not fringed. The flowers are of many shades of color and with the throat beautifully lined	Pkt of 200 seeds \$.25	.40	.75
659— Triumph . A large-flowered single variety with beautifully fringed flowers of a charming shade of pink like "Rosy Morn." Pkt. 200 seeds 25c.			
657— Single Mixed Colors . Small flowering class suitable for bedding.....	$\frac{1}{4}$ Oz. \$.20		\$.75
658— Rosy Morn . Small flowered single variety with flowers of a pretty shade of pure pink with no purple shade	$\frac{1}{8}$ oz. 30c..	.50	..

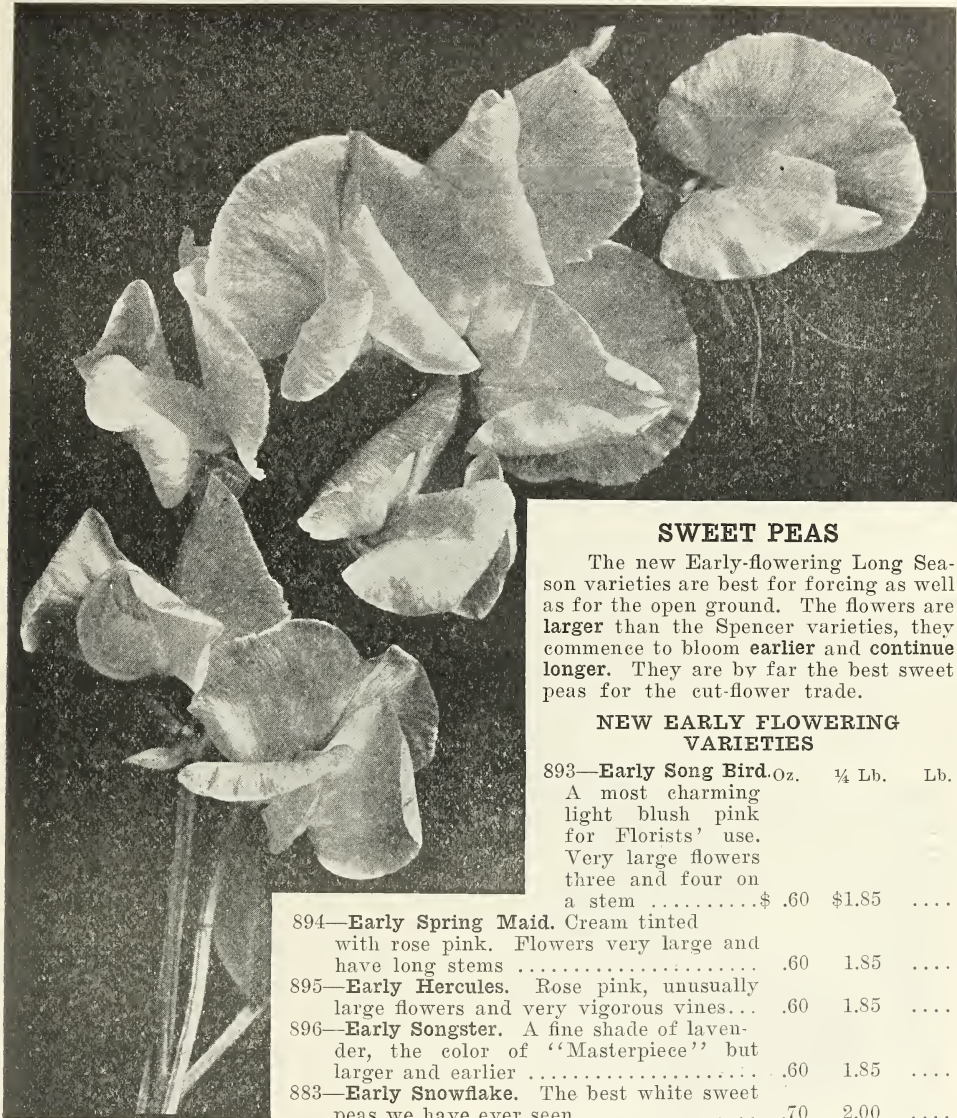

POPPIES

700— Shirley . Single and semi-double flowers of delicate colors.....	\$.10	\$.35
705— Double Carnation . Large double flowers making almost a perfect ball.		
Mixed colors	.10	.35
720— Oriental . Hardy perennial, flowering the second year after sowing. Flowers 6 inches across. Color glowing scarlet. Grow four feet tall....	.30	1.00

PYRETHRUM or "PAINTED DAISY"

The flowers resemble large field daisies, but are of many shades of pink and red. They bloom in June and July and make charming cut flowers. Perfectly hardy and will last for years.

740— Single Large Flowering (Grandiflorum)	$\frac{1}{4}$ Oz. \$.45	Oz. \$1.75
---	--------------------------	------------

SWEET PEAS

The new Early-flowering Long Season varieties are best for forcing as well as for the open ground. The flowers are **larger** than the Spencer varieties, they commence to bloom **earlier** and **continue longer**. They are by far the best sweet peas for the cut-flower trade.

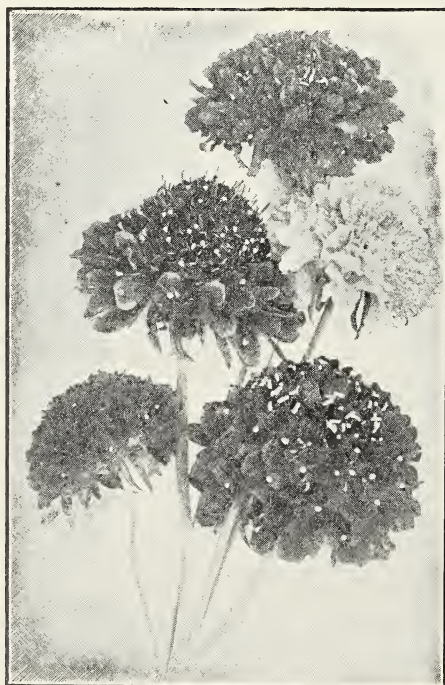

NEW EARLY FLOWERING VARIETIES

893—Early Song Bird.	Oz.	¼ Lb.	Lb.
A most charming light blush pink for Florists' use. Very large flowers three and four on a stem			
	\$.60	\$1.85
894—Early Spring Maid.	Cream tinted with rose pink. Flowers very large and have long stems		
	.60	1.85
895—Early Hercules.	Rose pink, unusually large flowers and very vigorous vines... ..		
	.60	1.85
896—Early Songster.	A fine shade of lavender, the color of "Masterpiece" but larger and earlier		
	.60	1.85
883—Early Snowflake.	The best white sweet peas we have ever seen		
	.70	2.00
884—Early Liberty.	Bright crimson. The best of this color, quite "sun proof" ..		
	.60	1.85
888—Early Morning Star.	Orange-scarlet, very handsome.....		
	.60	1.85
871—Yarrowa.	The oldest of the early flowering varieties. Rose pink on cream ground. A charming flower		
	.60	1.85
891—Early Flowering Varieties Mixed50	1.60	6.00

"Last spring I ordered some Moreton Pink Aster and Yarrowa Sweet Peas and they are without exception the finest I have ever seen. Everybody that sees my pink asters cannot stop talking of them. They are simply beautiful."—Mrs. Ralph King, Ogdensburg, N. Y.

SPENCER VARIETIES OF SWEET PEAS

855—Blue Picotee (Mrs. Townsend). White with a picotee edge of blue around all the petals	Oz. \$.40	¼ Lb. \$1.25	Lb. \$...

859—Wedgewood. Considered the best blue sweet pea. Flowers very large and beautifully waved40	1.10
870—White Spencer. Considered the largest and best white sweet pea	.45	1.50
872—Spencer Varieties Mixed. This mixture contains nothing but the best "Spencer" varieties of the most attractive colors.....	.25	.75	2.75
Grandiflora Sweet Peas, not "Spencer" Type.			
879—Brilliant Blue (or Lord Nelson). Bluish-purple.....	\$.15	\$.35	\$1.25
877—Dorothy Eckford. White15	.35	1.25
874—Flora Norton. Lavender15	.35	1.25
873—Henry Eckford. Orange-scarlet15	.35	1.25
880—King Edward VII. Bright red; very fine15	.35	1.25
878—Prima Donna. Pure light pink; very fine15	.35	1.25
881—Prince of Wales. Rose pink15	.35	1.25
882—MIXED COLORS. A good mixture of the best colors.....	.12	.30	.95

SCABIOSA or MORNING BRIDE

SCABIOSA OR MORNING BRIDE

The Scabiosa is a very satisfactory flower. Seed sown in the open ground will produce flowers in August and they will continue to bloom until the snow flies. The flowers are double and are produced on stiff stems two feet tall. They keep well when cut and are handsome flowers for the house.

Improved Large Flowered Varieties. Large double flowers on long stiff stems.

	¼ Oz.	Oz.
777—Azure Fairy. Light blue or blue-lavender, of a very pleas- ing shade	\$.15	\$.45
779—Snowball. White. Very handsome15	.45
778—Scarlet15	.45
772—Flesh Pink15	.45
773—Cherry Red15	.45
781—Rose. Rose-pink15	.45
776—Mixed Colors. A mixture of all the above varieties.....	.12	.40
780—CAUCASICA. Hardy per- ennial with large lavender flowers, very handsome70	2.50
782—Caucasica, White75	2.75

SALPIGLOSSIS or VELVET TRUMPET

These charming flowers should be more largely grown.

	¼ Oz.	Oz.
750— Grandiflora. Has the largest flowers and the best colors.....	\$.20	\$.65

Salvia Splendens

SALVIA or SCARLET SAGE

Many gardeners find a ready sale for Salvia plants at profitable prices. Seed should be sown in a warm house or hotbed in February or March.

	¼ Oz.	Oz.
760— Salvia Splendens. The old "Scarlet Sage." Grows three feet high....	\$.45	\$1.65
761— Salvia Splendens, "Bonfire." An improved variety of the old Splendens with longer spikes and more compact bush form. Grows 2½ to 3 feet tall and brilliant red flowers cover the whole plant from the ground up.....	.60	2.25
762— Dwarf Zurich. The plants grow about 18 inches high and are covered with brilliant red flowers of medium size. Flowers very early..	1-16 oz. 35c.	1.10 4.00

SNAPDRAGON (Antirrhinum)

Very popular just now and in demand for cut flowers. There is also a good sale for plants.

The varieties we offer are all of the best tall, large-flowering class.

790— Queen Victoria. White	\$.20	\$.65
793— Golden King. Bright yellow20	.65
796— Venus. Beautiful light pink with white throat. A charming variety...	.25	.85
794— Silver Pink. A delicate pink, very handsome35	1.25
791— Rose Queen. Rose-pink20	.75
792— Firefly. Scarlet with yellow throat20	.65
797— Mixed Colors18	.60

Beauty of Nice Stock

STOCKS

	$\frac{1}{4}$ Oz.	Oz.
820— Ten-Weeks, Large-Flowering Dwarf. A good early flowering stock for bedding. Double flowers of the best colors	$\frac{1}{4}$ oz. 40c..\$.75

A fine bedding plant. There is often a good demand for the plants.

930— Mammoth. The largest flowers and best colors. Mixed colors	\$.25	\$.90
931— Mammoth White30	1.00

XERANTHEMUM.

A popular "Everlasting," see page 39.

ZINNIA

Very profitable as cut flowers if a really good strain of seed is used.

Harris' Double Giant Zinnias. We believe we have the finest strain of Zinnias ever raised in this country. We have been raising the seed ourselves for some years and have bred up a strain that is unequaled for size and fullness of the flowers and richness of the colors.

Practically every plant produces immense, perfectly formed double flowers. The colors are not yet fully fixed, but all the colors that appear are good.

	$\frac{1}{4}$ Oz.	Oz.
975— Harris' Double Giant, Scarlet. Very handsome	\$.50	\$1.85
976— Harris' Double Giant, Golden yellow, fine50	1.85
978— Harris' Double Giant, Mixed colors. All very fine colors40	1.50
982— Double Giant, Mixed colors. Not our own growing, but very good stock	.20	.75
983— PICOTEE. A new variety with each petal tipped with a color that is different from the general color of the flowers. This gives the flower a very novel and pleasing effect	Packet 10c.. .50

FLOWERING BULBS AND PLANTS

Practically all the plants and bulbs we offer are of our own growing and will be found of high quality in every way. Orders will be booked at any time and plants sent when ready.

PLANTS OF ANNUAL FLOWERS

We can furnish limited quantity of the following plants all transplanted and well hardened.

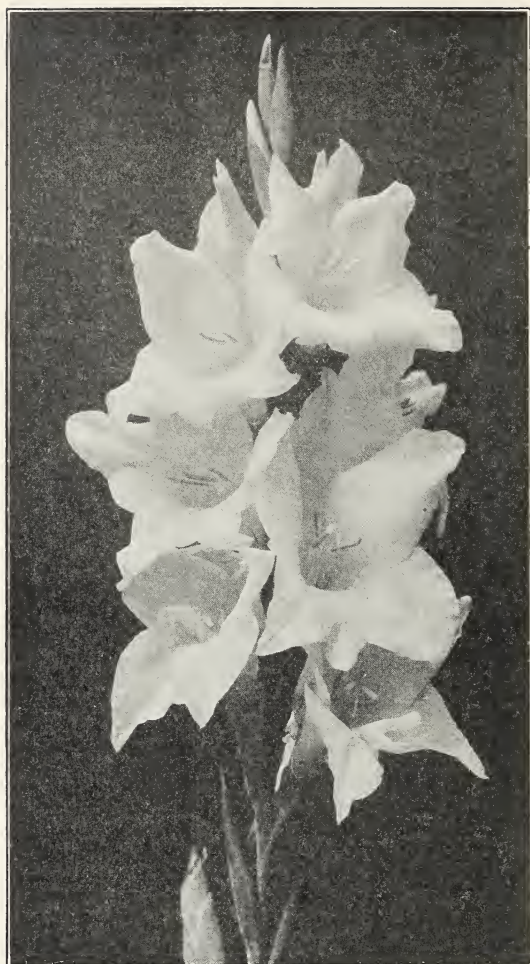

Asters. Strong plants of the following varieties ready May 15th: Moreton Pink, Royal Purple, Royal White, Peerless Pink, Rose King, Lavender Rochester, Late Branching White, Late Branching Rose, Late Branching, mixed colors.....	100

CANNAS

The roots we offer are good; sound pieces, with two and three eyes. The varieties are the best we know of. Bulbs cannot be shipped before the middle of March.

HUNGARIA —A beautiful new pink canna the color of a LaFrance rose. The flowers are very large and produced on immense trusses. Green foliage 3½ feet	Doz.	100
WM. SAUNDERS —Another new variety, considered the best bronze-leaved canna for bedding, as it grows only 3½ feet high and produces immense flowers of a glowing crimson-scarlet often 5 inches across.....	\$1.00
Souv. d'Antoine Crozy. Brilliant scarlet flowers edged with gold. One of the most showy and attractive cannas grown. Flowers large and abundant and do not fade in the sun. Green foliage; 4 feet.....	.75	5.25
Florence Vaughan. Rich golden yellow, dotted with crimson; large and handsome flowers. Green foliage; 4½ feet70	4.75
J. D. Eisele. Flowers of large size and a beautiful shade of vermilion scarlet with an orange shading; one of the very finest. Green foliage; 5 feet... ..	.70	4.50
Pennsylvania. Immense flower of an intense orange-scarlet, a charming shade of color and one of the best cannas. Flowers often 7 inches across and produced in great abundance. Green foliage; 5½ feet65	4.25
JEAN TESSOT. Most brilliant glowing scarlet. Large flowers and very handsome. One of the best we have seen. Green foliage; 5 feet65	4.25
KING HUMBERT. This is one of the very finest cannas yet produced. The flowers are of immense size, often 6 inches across, and the color is an intense orange-scarlet with deep red markings. The leaves are bronze red and the whole effect is very striking. Should be in every collection. 4½ ft. The bulbs we offer are all 1½ inches or larger, except where noted..	.75	5.00
FIREBIRD. Pure brilliant scarlet. Large flowers, green foliage 4½ feet..	1.50	10.00

Gladiolus—Glory of Holland

GLADIOLUS

There is no better flower for the cut flower grower than really good varieties of gladiolus. Don't raise common mixtures. They are not profitable. The bulbs we offer are all first size, over 1¼ inches.

America. The standard light pink gladiolus. Large flowers that bloom medium early	Doz.	100	
Dawn (Tracy's). One of the very finest of the new varieties. The color is light salmon or shell pink shading to white inside, with purple markings on the lower petals	1.50		12.00
Panama. Flowers of the largest size and graceful form, while the color is a charming shade of deep salmon pink with a silvery luster. One of the very best. Medium early	.80		5.50
Mrs. Francis King. The large flowers are of an intense vermilion scarlet that always attracts attention. 4 to 5 feet tall; mid-season50		3.50
BARON HULOT. This is considered the best "blue" gladiolus. The flowers are large and the color is of an indigo shade. Very unusual and handsome60		4.50
GLORY OF HOLLAND. Pure creamy white; large and very handsome. One of the very best white varieties. Of vigorous growth, the spikes of flowers standing 4 feet or more high	.60		4.00
HALLEY. A very early flowering variety with immense flowers of a deep salmon pink. In the throat are small white blotches marked with scarlet. The finest early variety45		2.75
SCHWABEN. Decidedly the finest yellow gladiolus. A very vigorous grower producing long spikes of very large flowers 6 inches across. The color is clear light yellow90		6.50
Peace. A charming new variety almost white with purple markings on lower petals. The flowers are immense and open nearly the whole length of the spike at the same time. Medium late80		5.00
War. (See colored plate, page 79). A magnificent new gladiolus. The flowers are of immense size and of a deep glowing crimson. The finest deep red gladiolus yet produced. Spikes of flowers very long and 8 to 10 flowers are out at one time; late	1.00		7.00
Niagara. Creamy colored flowers with lower petals deeper yellow and the ends splashed with carmine. The throat is also marked with a spot of carmine. The flowers are very large and well expanded. One of the finest light colored varieties75		6.00
MRS. FRANK PENDLETON. A magnificent flower of the largest size, and a beautiful shade of color, salmon pink deepening towards the center with a large deep red blotch in the throat	1.10		8.00
Mrs. Fryer. A grand new variety of a glowing scarlet or flame color. Very large and of handsomest form. Medium late90		7.00
Mixture No. 1. This mixture contains some of the best varieties and all are good and of the large flowering types35		2.75

INSECTICIDES AND FERTILIZERS

ARSENATE OF LEAD. We find this a much better and cheaper poison than Paris green for use on potatoes, apple trees, etc. It is in paste form and should be applied with water, using 1 lb. to 20 gals. of water. 1-lb. can 35c; 12½-lb. pails \$2.75 each; 25-lb. pails \$4.85; 50-lb. kegs \$9.00; 100-lb. kegs \$17.50.

TOBACCO DUST. Tobacco dust is an excellent material for keeping bugs off cucumber, melon and squash vines. The dust should be applied when the leaves are wet so that it will adhere to them. It should be used in liberal quantities. For fumigating greenhouses the tobacco dust we sell is most excellent. It burns evenly and will light without the use of kerosene. 5 lbs. will fumigate a house 20 x 100 feet. 5-lb. package 50c; 10-lbs. 75c; 50 lbs. or more at 7c per lb.

FORMALIN (Formaldehyde, 40 per cent). A valuable disinfectant for destroying germs that cause diseases in plants. It is very effective when used to destroy smut germs in oats and scab on potatoes. To treat oats use 1 pint formalin to 50 gallons of water and soak ten minutes. For potatoes use 1 pint to 30 gallons and soak two hours. Pint 50c; quart 90c; gallon jug \$3.00.

SULPHO-TOBACCO SOAP. For killing aphides or lice on roses and other plants we have found nothing so effective and convenient as Sulpho-Tobacco Soap. Directions for use are printed on the cover of each cake. A 3-oz. cake makes 1½ gallons, and an 8-oz. cake 4 gallons of the solution. 3-oz. cakes 10c; 8-oz. cakes 20c.

BUG DEATH. A well-known insecticide. It is a fine powder and may be applied with a duster or in water as preferred.

1-lb. package 25c each; 5-lb. package 75c each; 12½-lb. kegs \$1.75 each.

LAMBERT'S DEATH TO LICE. This is the most effective remedy for killing lice on poultry we have found. Death to Lice is a powder and is easily applied to the fowls by dusting it through the feathers. It kills the lice within a few minutes after applying. It should be used on setting hens and young chickens as soon as hatched. It is perfectly harmless and will not injure the most delicate chickens. 15-ounce cans 25c. Full directions for use are printed on each can.

WHITE HELLEBORE. The best remedy for currant and cabbage worms. Apply dry or in water. Per lb. 85c.

NITRATE OF SODA. This is the most soluble and quickly available form of nitrogen or "ammonia." It is of great benefit in forcing a strong, luxuriant growth in plants. It is especially valuable for cabbage, cauliflower, beets, carrots, onions, tomatoes, potatoes and similar crops, as well as for grass and grain. It can be advantageously used as a top dressing after plants are up. It is immediately available to the plants when applied.

Gardeners should always have some nitrate of soda on hand and use it whenever they want to promote a quick, strong growth in plants. A little nitrate dissolved in water at the rate of about a tablespoonful (1 oz.) to 2 gallons of water will stimulate a rapid growth either when applied to plants in frames, greenhouses or the open ground. If your plants don't grow well, try a little nitrate on them—but don't use too much. 10 lbs., 75c; 50 lbs. \$3.25; 100 lbs. \$5.75; bag (200 lbs.) \$11.00. Prices subject to change.

PROTECT CABBAGE PLANTS FROM MAGGOTS

The most effective way to keep early cabbage and cauliflower free from maggots at the roots appears to be the tar-paper pads or discs, which have been used for some years on Long Island with excellent results.

The eggs which produce the maggots are laid on the stems of the plants by a little fly about the size of the common house fly. When the eggs hatch the young maggots crawl down to the roots and there eat the stem until the plant dies, or is badly injured.

It has been found that small discs or pads made of tarred paper placed around the stem of the plant when set out prevent the fly from laying the eggs on the stem and thus save the plant from injury.

The New York State Agricultural Experiment Station issued a bulletin some time ago referring to experiments made with different methods of protecting plants from the maggots. According to this report the tar-paper pads proved by far the most effective method of treatment.

How to apply the tar pads. By means of a slit the pad is slipped around the stem of the plant, the center of the pad being also slit cross-ways bends down and fits closely around the stem.

Apply the pads the same day the plants are set out. If this work is delayed for a few days it gives the flies a chance to deposit their eggs.

Price of Tar-Paper Pads. 100, 40c; 1000, \$2.50; 5000 or more at \$2.25 per 1000.

HARRIS' SEEDS

1920

Harris' Double Giant Zinnias. A very superior strain of our own growing. See page 46

JOSEPH HARRIS CO.

Moreton Farm

COLDWATER, N. Y.
